TIGER RESOURCES INCREASES 2014 COPPER PRODUCTION GUIDANCE 85%

Highlights

- **85% increase in 2014 production guidance**
- **HMS plant to produce 39,000 tonnes of copper in concentrate, up from 21,000 tonnes**
- **Stage 2 SXEW plant on target to start copper cathode production in Q2-2014**

Perth, Western Australia: Tiger Resources Limited (ASX: TGS) is pleased to announce it has increased 2014 production guidance by 85% at the Company's Kipoi Copper Project in the Democratic Republic of Congo (DRC).

Following the completion of life of mine grade control drilling at Kipoi Central, Tiger's 2014 production guidance for the Stage 1 heavy media separation (HMS) plant has increased to 39,000 tonnes of copper in concentrate, an increase of 85% from the previous guidance of 21,000 tonnes.

The Company's guidance for the HMS plant's average operating cost for 2014 of \$0.30/lb of copper produced is maintained.

In addition to the HMS plant copper production, the Stage 2 solvent-extraction electro-winning (SXEW) plant is due to start copper cathode production in Q2-2014. The Company plans to produce 25,000 tonnes of copper cathode in the first full 12 months of production at the SXEW plant.

Caution Regarding Forward Looking Statements and Forward Looking Information: This report contains forward looking statements and forward looking information, which are based on assumptions and judgments of management regarding future events and results. Such forward-looking statements and forward looking information, including but not limited to those with respect to the Stage 1 mining, HMS and spiral system operations and the development of a Stage 2 SXEW plant at Kipoi Central, involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any anticipated future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the actual market prices of copper, cobalt and silver, the actual results of current exploration, the availability of debt financing, the volatility in global financial markets, the actual results of future mining, processing and development activities and changes in project parameters as plans continue to be evaluated. There can be no assurance that the Stage 1 HMS plant will operate in accordance with forecast performance, that anticipated metallurgical recoveries will be achieved, that future evaluation work will confirm the viability of deposits identified within the project, that future required regulatory approvals will be obtained, that the Stage 2 expansion of the Kipoi Project will proceed as planned and within expected time limits and budgets or that, when completed, the expanded Kipoi Stage 2 project will operate as anticipated.
