

# Database Administrator (NW11551)

Sydney, New South Wales, Australia (Hybrid)

## ASX: Powering Australia's financial markets

### Why join the ASX?

When you join ASX, you're joining a company with a strong purpose – to power a stronger economic future by enabling a fair and dynamic marketplace for all.

In your new role, you'll be part of a leading global securities exchange with a strong brand. We are known for being a trusted market operator and an exciting data hub.

Want to know why we are a great place to work, visit our [careers page](#) to learn more.

### We are more than a securities exchange!

The ASX team brings together talented people from a diverse range of disciplines.

We run critical market infrastructure, with 1 in 3 people employed within technology. Yet we have a unique complexity of roles across a range of disciplines such as operations, program delivery, financial products, investor engagement, risk and compliance.

We're proud of the diversity of our organisation and the culture of inclusion that all our people help to build every day. Our employee-led groups are known for celebrating cultural and religious events, championing LGBTIQ+ inclusion, inspiring giving and volunteering, promoting gender equality, and wellbeing. We are an Employer of Choice for Gender Equality (WGEA) and a member of the Champions of Change Coalition for the advancement of gender equality in Australia.

### About the team:

The Hosting Database team is part the Infrastructure department within ASX Technology. We are responsible for the administration of business-critical database servers across ASX. The majority of these currently run on the SQL Server and Oracle Database platforms. We are currently expanding our cloud capability, with a focus on PostgreSQL in AWS RDS/Aurora.

### What you will be doing:

- > Deploy, maintain and support PostgreSQL instances in AWS RDS/Aurora
- > Build, maintain and support SQL Server, Oracle Database and other database servers on premise
- > Recommend best practices and approaches for administration of AWS RDS/Aurora
- > Monitor and optimise the performance of database instances
- > Resolve database incidents and requests
- > Create and maintain documentation

## What you will bring:

### Must have

- > Database administration experience in a corporate environment
- > Strong technical skills and experience supporting PostgreSQL in AWS RDS/Aurora
- > Hands-on experience supporting SQL Server (2012 to 2022) and/or Oracle Database (12c to 19c)
- > Good working knowledge of Windows Server (2012 to 2022) and Red Hat Enterprise Linux (7 to 9)
- > Demonstrated experience supporting enterprise scale infrastructure
- > Experience with high availability and disaster recovery solutions

### Nice to have

- > Financial services industry experience or knowledge
- > Database migration/upgrade project experience
- > Experience supporting MySQL or Netezza
- > AWS, Microsoft, Oracle or other related certifications

We make hiring decisions based on your skills, capabilities and experience, and how you'll help us to live our values. We encourage you to apply even if you don't meet all the criteria of this role. If you need any adjustments during the application or interview process to help you present your best self, please let us know.

At ASX Group, our diverse workforce is essential to build and maintain a fair and dynamic marketplace. We support flexible working and offer hybrid working options. Even if our roles are advertised as full-time, we encourage you to apply if you are interested in part-time or other flexible working arrangements.

We will arrange for successful candidates to have background checks, including reference and police checks completed as part of the on-boarding process.

***Recruitment Agencies: ASX does not accept any unsolicited agency resumes and will not be responsible for any fees related to unsolicited resumes.***
