

MARKET ANNOUNCEMENT

6 July 2011

ASX Group Monthly Activity Report – June 2011

The value of ASX-listed stocks, as measured by the All Ordinaries Index, fell 2.7% during June 2011. Many other major markets also fell during the month including Hong Kong down 5.4%, the US down 1.8%, the UK down 0.7%, and Singapore down 1.2%. In contrast Japan was up 1.3%.

Over the course of financial year 2011 (FY11), the All Ordinaries rose 7.7% following a rise of 9.5% in the previous financial year. Market volatility was slightly lower in FY11 (0.6% average daily movements compared to 0.8% in FY10). The rise in Australian equity valuation lagged behind many other major markets with the US up 28.1%, the UK up 20.9%, Hong Kong up 11.3%, and Singapore up 10.0%. This relative performance, in large part, reflected the strong rise in the Australian dollar over the financial year: 26.0% higher against the US dollar, 14.4% higher against the yen and 6.1% higher against the euro.

Market conditions helped underpin continued strong secondary equity market trading and a further increase in initial public offering (IPO) activity during FY11. Secondary capital raising activity remained healthy in FY11, although lower than FY10 and well down on the record levels seen during FY09.

Australian Equity Market Volatility
Monthly average

Measures of volatility in the Australian equity market were generally restrained during June:

- Current volatility (as measured by the average daily movement in the All Ordinaries Index) was 0.7% in June (May 0.8%).
- Expected future volatility (as measured by the S&P/ASX 200 VIX) rose on average in June to 19.6 (compared to 18.4 in May).

Volatility in US markets (S&P 500 Index) rose sharply in June with average daily movements of 0.9% (0.6% in May). Expectations of future volatility in the US also rose during June.

Trading – Financial derivatives markets

- There was a continuation of very strong trading activity in the benchmark interest rate contracts in June (an expiry month), including record monthly volume in:
 - 30 day cash rate futures (885,640 contracts), 8% higher than the previous record set in May 2011.
 - 90 day bank bill futures (2,879,948 contracts), 7% higher than the previous record set in August 2007.
 - 3 year treasury bond futures (5,365,381 contracts), 15% higher than the previous record set in March 2011.
- Volatility in the short end of the yield curve drove activity in the 30 day interbank futures and 90 day bank bill futures as the market's view on future changes in the official cash rate by the RBA changed. At the beginning of the month, market expectations were for another 25 basis points increase in the official cash rate by mid next year. However, with economic data signalling a weaker domestic economy and concerns over the euro debt crisis deepening, market expectations turned to the probability of a rate cut in the second half of 2011.
- Equity derivatives volume (excluding the ASX SPI 200) for June 2011 was 16.2 million contracts. Measuring volumes on the prior contract size in order to allow for a meaningful comparison, results in equity derivatives volume (excluding the ASX SPI 200) for June 2011 of 2.5 million contracts. This represents a 26% increase in total volumes compared to the pcp, with a daily average of 118,559 contracts, up 26% on pcp. Total volumes for FY11 (based on the prior contract size) were 23.1 million contracts corresponding to an average daily volume of 91,495 contracts, both up 7% on the pcp.
- Total futures and options on futures contracts volume (excluding equity derivatives and CFDs) for June 2011 was a record 13.6 million, up 71% on the pcp, with a notional value of \$6.6 trillion. Average daily contracts volume during June 2011 of 616,781 was also up 71% on the pcp. Total volumes for FY11 were a record 98.0 million contracts ,corresponding to an average daily volume of 382,687 contracts, both up 29% on the pcp.
- A total of 5,937 ASX CFD trades were transacted in June 2011, comprising a volume of 15.3 million contracts. The total notional value of all CFD trades for June was \$204.2 million, a decrease of 26% on the pcp, while the value of CFD open interest at the end of June was \$87.1 million, a decrease of 27% on the pcp. Total ASX CFD trades in FY11 were 92,905, down 25% on FY10, comprising 176.5 million contracts, up 15%, and with a notional value of \$3.5 billion, down 4%.
