¹ Price queries are enquiries made by ASX (either by letter or phone) to a listed entity if it detects unusual movements in a listed entity's security price or trading volumes to ask if the listed entity is aware of any information that has not been announced which, if known, might explain the movements.

² Other continuous disclosure queries are queries (other than price queries) raised by ASX with listed entities when ASX has concerns the entity may not be in compliance with its continuous disclosure obligations under Listing Rules 3.1, 3.1A and 3.1B. Examples include a query made following a media report or an announcement lodged with ASX.

³ Aware letters are sent by ASX following an announcement by a listed entity and ask for details of when the listed entity became aware of the material information contained in the announcement.

⁵ ASX is required, under sections 792B(2)(c) and 821B(2)(c) of the Corporations Act 2001, to refer a matter to ASIC if it has reason to suspect that a person has committed, is committing, or is about to commit a significant contravention of the ASX Group's Operating Rules or the Corporations Act. It should be noted that a single referral may relate to more than one potential contravention. It should also be noted that the fact a matter has been referred to ASIC does not necessarily mean that a contravention has been committed or that ASIC will take enforcement proceedings in relation to it.

ASX Rule Changes, Waivers and Exemptions

A number of volatility controls for equity index futures contracts were introduced into the ASX24 Operating Rules Procedures on 26 May. The controls have been introduced to conform to the ASIC Market Integrity Rules (Competition in Exchange Markets) 2011. They include an Extreme Trade Range (which sets the upper and lower price boundaries for a contract in a given trading session), an Anomalous Order Threshold (which stops aggressive orders from entering the market outside an allowed range) and a Regulatory Halt Session State (which enables the ETR/AOT to be reset in the event of erroneous trading). These volatility controls apply to the ASX SPI 200™ index futures (AP), S&P/ASX200 Resources index futures (AR) and the S&P/ASX200 Financials-x-A-REIT index futures (AF) contracts.

Procedure 16 of the ASX Clear (Futures) Operating Rules has been amended to reflect the upgrade of the ASX Clear (Futures) clearing system to Genium INET Clearing. Effective from 19 May, Genium INET Clearing replaced OM SECUR in the list of approved software and equipment for use by clearing participants.

Details of these rule changes can be accessed online at: <http://www.asx.com.au/regulation/rules/recent-rule-amendments.htm>

There were 47 waivers granted in relation to the ASX Listing Rules and four waivers in relation to ASX Operating Rules and ASX 24 Operating Rules. Details of waivers and exemptions granted by ASX can be accessed online by clicking on the relevant rule book on the Rules, Guidance Notes and Waivers page on the ASX website (<http://www.asx.com.au/regulation/rules-guidance-notes-and-waivers.htm>) and then clicking on the waivers tab.
