1. Response to Tranche 1 Consultation Paper

1.1. Tranche 1 consultation and response

On 15 November 2019, ASX released a Consultation Paper relating to tranche 1 rule amendments for the CHES replacement system.¹ These rule amendments addressed accounts, participants, securities and pre-settlement aspects for 'Day 1' of the new system. This paper:

- contains a summary of the feedback received in stakeholder submissions (see **Attachment A**);
- contains ASX's response to such feedback, including addressing respondents' requests for clarification and further information (see **Attachment A**); and
- includes the draft rule changes made to the ASX Settlement Operating Rules and Procedures and ASX Clear Operating Rules and Procedures, which take into account feedback received (see a summary of these rule changes in **Attachment B**, as well as the full set of tranche 1 rule amendments updated to incorporate these changes in **Attachment D** and **Attachment E**).

1.2. Submissions received

ASX received a total of 12 submissions from a range of stakeholders including participants, registries, industry bodies and vendors. Five of these submissions were confidential. ASX has published non-confidential submissions at <https://www.asx.com.au/regulation/public-consultations.htm>.

ASX thanks all stakeholders who shared their views and provided submissions in response to the tranche 1 consultation paper.

2. Summary of the feedback received

2.1. Feedback received

Stakeholders provided both general and specific drafting feedback on the proposed tranche 1 rule amendments. This feedback is summarised on an anonymised basis in the table in **Attachment A**. Attachment A also contains ASX's response to feedback received, and indicates whether amendments to the rules have been made in response to this feedback.

2.2. Common themes raised

Some common themes were raised by stakeholders in relation to tranche 1, including:

- General support for the tranche 1 rule amendments, subject to specific feedback received on some amendments.
- Requests for further information about the solution design, including in relation to account and holder creation, locking and unlocking securities, securities state and settlement instructions, and transfers and conversions.
- Requests for clarification as to alignment of the proposed rule amendments with the account and holder solution design presented in the user technical documentation.
- Requests for further detail regarding privacy and governance arrangements in relation to the collection, storage and handling of information in the new system.
- Queries as to how the rulebooks will address migration from CHES to the new system, including how mandatory data fields for holder records will be updated and what the approach will be for mandatory versus optional functionality.
- Requests for clarification on the documentation that will replace the existing Australian Settlement Procedure Guidelines (APGs) and CHES External Interface Specification (EIS).

¹ The tranche 1 consultation paper is available here: <https://www.asx.com.au/documents/public-consultations/ches-replacement-tranche1-rule-amendment.PDF>.

- Comments regarding the overall rule amendment consultation process, including how rule amendments are released to the market and scope of the consultation.

2.3. Specific feedback raised

More specific feedback was also received on particular rule amendments. A high level summary of the feedback received is set out below. Please refer to Attachment A for a more detailed summary of all feedback received.

- Four stakeholders provided comments in relation to the definition of “Holder Record” under the ASX Settlement Operating Rules, including in relation to how information is to be maintained and that each piece of information that may be maintained in a holder record should be identified.
- Five stakeholders queried how the proposed solution design for joint holders (which will impose a system limitation on recording more than four joint holders in the new system) will practically be enforced by issuers and participants where only three joint holders are presently allowed under the issuer’s constitution.
- One stakeholder opposed the removal of the definition of “Email Purpose” from the ASX Settlement Operating Rules and ASX Settlement Operating Rule Procedures and considered that a controlling participant should continue to be able to specify whether a holder wished to receive electronic communications from ASX only, from issuers only, or from both ASX and issuers.
- Feedback was received from two stakeholders in relation to the type of information that forms part of the CHES subregister. One stakeholder commented that the ASX Settlement Operating Rules should specifically define what the register is. Another stakeholder suggested that bank account details and tax file numbers should be included on the register to facilitate payments in the case of a takeover.
- Three stakeholders sought further information about the operation of holding locks, including use cases and any changes to existing processing.
- Feedback was received from two stakeholders in relation to the automated closure of a security subregister, including that the timing for such closure should be reduced and the impacts on issuers of additional notifications as to such closure.
- Two stakeholders queried how ASX Clear might exercise a proposed new power which enables it to remove cash CCP transactions from set-off if it considers it reasonably necessary in order to maintain the orderly operation and integrity of ASX Clear.
- Feedback was received from one stakeholder requesting ASX to consider removing the requirement for Participants to contact ASX Operations ‘in all cases’ to request the replacement of Cover.
- Feedback was received from five stakeholders in relation to transfers and conversions, including queries on the impact of the BAU rule changes for transfers to the CHES Subregister implemented 18 December 2019 and the potential increase in fail rates due to differences in registration details held by issuers and participants. One stakeholder considered that ASX should not proceed with these changes and continue to process transfers and conversions as they occur today (including under the BAU changes) without pre-transfer validation being undertaken by issuers for transfers involving settlement participants that are market participants or custodial settlement participants.
- Feedback was received from one stakeholder suggesting changes to more clearly address the function of the secondary matching flag in the new bilateral transaction matching functionality (allowing for mandatory matching identifiers to be specified) for demand and settlement instructions.
- Two stakeholders queried how corporate action adjustments to holdings would be processed when demand locks and settlement locks had been applied in connection with the performance of demand and settlement instructions. One stakeholder considered that issuers have recourse against the settlement participants that are party to such instructions in such instance.

- Seven stakeholders provided feedback in relation to whether ASX should mandate use of settlement locks for CHESS holdings. In relation to this feedback, six stakeholders were not supportive of not mandating this functionality, while one stakeholder was supportive of mandating it.

3. ASX response to feedback received

3.1. ASX response to feedback

ASX is grateful for the feedback provided by stakeholders. **Attachment A** sets out ASX's response to each of the aspects raised in submissions, including:

- Providing further information (or links to further information) in relation to the proposed rule amendments, functionality design or consultation process where such information was requested.
- Responding to specific drafting comments on the rule amendments, adopting the drafting comments where appropriate or explaining why such drafting comments have not been adopted.
- Seeking to provide further clarification on the proposed rule amendments.

3.2. Changes to draft rules in response to feedback

In response to stakeholder feedback received, ASX is making the following changes to the draft rules:

- Amend the definition of "Holder Record" and "Registration Details" in the ASX Settlement Operating Rules to provide further clarification as to the way the rulebooks align with the account and holder functionality as expressed in the user technical documentation. See also **Attachment C** for a diagram that explains the relationship between the user technical documentation and rulebook terminology in relation to account and holder creation.
- Reinstate the concept of "Email Purpose" into the ASX Settlement Operating Rules and ASX Settlement Operating Rule Procedures, enabling controlling participants to identify whether a holder wishes to receive electronic communications from ASX only, issuers only, or both ASX and issuers.
- Amend the tranche 1 rule amendments dealing with the new bilateral transaction matching functionality for demand and settlement instructions to more clearly reflect the use of the secondary matching flag in the operation of such functionality.
- Remove the requirement to notify ASX Operations when replacing Cover (Collateral or Cash Cover) for another form of Cover, so that the relevant notification requirement in the ASX Clear Operating Rules is limited to the intraday exchange of Collateral.
- Make certain other drafting changes to the tranche 1 rule amendments.

Each of the further changes to the tranche 1 rule amendments are identified in the last column in Attachment A within the relevant row which explains that change.

3.3. Other aspects

ASX will also not be mandating settlement locks for CHESS holdings, given the broad support from six out of seven stakeholders for this approach.

In relation to data governance arrangements, data is provided in accordance with the operating rules and used to provide clearing and settlement services, as in existing CHESS. The operating rules specify what data needs to be provided and the purpose for which it is to be used.

Unless required under the rules or by law, the ASX Settlement Operating Rules expressly restrict the disclosure by ASX Settlement of information about financial products in a holding other than to the holder, their controlling participant, the issuer or the bid offeror (in the event of a takeover) (rule 8.11.3). The rules do permit ASX Settlement to disclose information regarding financial products in a holding or regarding participants and their activities to ASIC, the RBA, APRA, and an approved market operator or clearing facility and any governmental agency or regulatory authority (rule 8.11.4 and 3.8.1).

Further, it is noted that new information in the system will be provided on an optional basis (e.g. when investors choose to provide electronic notifications via CHES under new DRP/BSP election functionality) or otherwise represent limited changes to the way existing data is collected i.e. as a result of new ISO messaging fields that are related to information inherent in CHES or modifications of FATCA/CRS information for mFund.

As part of its consultation on the solution design for the new DRP/BSP election functionality, ASX received customer focus group feedback that to operate efficiently this would require issuers (via their share registries) to also notify CHES of DRP/BSP elections that they have received directly (ie, not via CHES). This allows broker participants to query CHES to see if an election has already been made for an investor and supports election updates made through CHES being based on the current election status as recorded by the issuer². This functionality and the supporting rule amendments are part of the current [tranche 2 rule consultation](#) closing on 29 May 2020 (refer section 1.2 of the consultation paper). If this new functionality is supported by the industry and incorporated in the new system it will involve new data being captured that will be used for the purpose of assisting with the processing of DRP/BSP elections.

ASX is preparing an information paper on its approach to data governance, which it will provide to the market in early August. The information paper will include an explanation of the legitimate interests for which data is collected, the privacy arrangements for personal information, deletion or de-identification of personal information which is no longer required for a permitted purpose and the masking of tax file numbers.

Aspects dealing with timing for enlivening rules providing for new functionality are to be addressed as part of transitional rules for the changeover to the new system, which are proposed to be released as part of a further consultation.

4. Further rule amendments

4.1. Other changes to draft rules

ASX has also made two further rule changes relevant to the topics covered by the tranche 1 rule amendments that are not directly related to feedback received from stakeholders, but have been identified following further consideration of the proposed rule amendments.

- An amendment to ASX Settlement Operating Rule 8.5.1 has been made to specify that a settlement lock will be removed if ASX Settlement suspends approval of a class of financial product. This change was not identified during the first tranche of rule amendments.
- The tranche 1 rule amendments proposed amendments to ASX Settlement Operating Rule 8.16.3 and the introduction of ASX Settlement Operating Rule 8.16.3A, to provide that a holder record lock will be removed on the expiry of any specified time period nominated by the controlling participant in the original message requesting the imposition of a lock. Some further rule amendments are required to clarify that controlling participants cannot specify a time period for a holder record lock to apply in the *originating message* under which the lock is requested, but will be able to specify this subsequently by way of *written notice* to ASX Settlement. This change to the way a controlling participant can request a time period for a holder record lock to apply has resulted in rule amendments to ASX Settlement Operating Rule 8.16.3, 8.16.3A and the introduction of a new ASX Settlement Operating Rule 8.15.11A. We note that issuers similarly will be able to specify a time period for a holding lock to apply by way of a notice to ASX Settlement. This is already addressed under the tranche 1 rule amendments to ASX Settlement Operating Rule 8.16.1, which are unchanged.

These changes will be consulted on as part of the consolidated rules package as referred to in section 5.2 below.

² Further information on the feedback obtained from stakeholders which was an input into the solution design for the development of this new functionality is contained in the [summary of stakeholder feedback](#) published by ASX.

5. Consultation process for rule amendments and next steps

5.1. Rule amendments required to support new system

ASX needs to make amendments to various operating rules to support the operation of the new system replacing CHESSE. These are required to reflect the solution design for new or changed functionality in the new system.

The solution design for the functionality in the new system has been developed in an iterative manner. This has included a process for obtaining industry input through focus groups and the ISO 20022 Technical Committee, which concluded with the final ISO 20022 Technical Committee meeting held in April 2020.

5.2. Three tranches of rule amendments for public consultation

ASX has sought to make the rules for new system functionality available to the market at an early stage, rather than waiting until all rules were available for the new system following completion of the solution design process.

Accordingly, ASX published a timetable in September 2019 which involved consulting on the required rule changes for the new system in three tranches. Each tranche would group related sets of rules reflecting the logical development of clearing and settlement aspects³.

- The tranche 1 draft rule amendments covered accounts, participants, securities and pre-settlement aspects for the new system and were released for public consultation on 15 November 2019⁴.
- The tranche 2 draft rule amendments covered corporate actions, mFund and RTGS payment aspects of the new system and were released on 21 February 2020.⁵
- The tranche 3 draft rule amendments cover batch settlement, reporting and miscellaneous aspects of the new system and were due to be released on 6 April 2020.

As indicated in the consultation paper for the tranche 2 rule amendments, ASX was also considering options for further consultation on the consolidation of the draft rules package across the three tranches of rule amendments.

As set out in ASX's [media release](#) on 25 March 2020, the consultation period for the tranche 2 rule amendments, which was due to conclude on 3 April 2020, was extended to 29 May 2020.

As also indicated in the [media release](#), consultation on the tranche 3 rule amendments was suspended until after the June consultation on the new CHESSE replacement implementation timetable. The process and timing for the consultation on the tranche 3 draft rule changes and the consolidated rules package will be set out in the June consultation paper, and is subject to feedback received through that process.

The changes to the consultation process for the tranche 2 and tranche 3 rule amendments were in recognition of the unfolding COVID-19 pandemic and the impact on stakeholders.

5.3. Response to consultation

This paper provides ASX's response to consultation feedback received on the tranche 1 draft rule amendments.

ASX is planning to release a response to consultation feedback received on the tranche 2 draft rule amendments in early-August 2020. This will allow stakeholders to understand any changes made to the tranche 2 rules resulting from consultation, which will be reflected in the consolidated rules package when it is released for consultation.

The response to consultation on the tranche 2 draft rule amendments will similarly contain a summary of the feedback received in stakeholder submissions, ASX's response to such feedback including addressing respondents' requests for

³ For example, tranche 1 covers off: accounts, participants and securities aspects - which are building blocks for other activities in the system; and pre-settlement activities - which are a pre-requisite to payments and settlements covered off in the second and third tranches

clarification and further information, and include the draft rule changes with the revisions made to take into account feedback received.

5.4. Regulatory clearance process

The rule amendments, including any changes made through the public consultation process, will be subject to the usual regulatory clearance processes.

ASX is planning to release the final rule changes at least six months prior to go-live of the new system. As set out in the 25 March media release, the timing for the new system to go-live is subject to consultation in June 2020.

The final form of the amendments will become effective at the time of go-live of the new system.

¹ Under ISO 20022 messaging standards adopted for the new system there is a separation between “account” and “holder” object with such information provided in a structured format - replacing the current unstructured 180 (6 lines of 30) characters for providing registration details for a holding. The adoption of ISO 20022 global messaging standards (replacing existing CHES EIS proprietary messaging standards) will provide greater interoperability to users as other market infrastructures, financial institutions, central banks and payments systems migrate to ISO 20022.

To assist industry, we have prepared a diagram in Attachment C to help explain how the User Technical Documentation aligns to the rulebooks in more detail.</p> <p>The rationale for the functional changes to account and holder functionality is due to a transition from recording holder details in an unstructured 180 character free text field currently in CHES, to recording this data in a structured format against certain data elements that aligns with ISO 20022 standards. Although the way in which this information is recorded in CHES is changing, existing concepts in the rulebooks can continue to apply, subject to any changes identified in the draft rules.</p> <ul style="list-style-type: none"> • The term "account" used in the User Technical Documentation is equivalent to the term "HIN" defined in the ASXSORs. • The term "Holder Record" used in the ASXSORs still refers to information that is recorded in connection with a HIN. We have made a rule amendment to the term "Holder Record" to make this clearer. • The term "Registration Details" refers to the one name (including for joint holdings, when a concatenation of the names of each joint holder), address and Residency Indicator recorded in relation to a HIN. We have made a rule amendment to the definition of "Registration Details" to make it clearer that these details relate to the "account level" (ie a HIN) rather than for joint accounts, in relation to one particular joint holder. 	<p>ASXSOR 2.13 definitions of "Entity Type", "Holder Record", "Named Holder Indicator", "Registration Details" and "UUID".</p> <p>ASXSORs 8.7.2, 8.11.1, 8.11.2 and 8.15.11.</p> <p>ASXSOR Procedure 8.7.2, 8.18.12 and 8.30.1.</p>

	<p>and the new Rule 8.6.3A should be revised.</p> <p>Amend rules to address the introduction of new Holder Record information, including specifying responsibility to update the information to ensure accuracy and reliability of the information.</p> <hr/> <p>The Holder Record definition is confusing. The definition does not refer to holders which form part of the CHES HIN registration. It is suggested a new term to replace Holder Record as per the current definition may be appropriate with Holder Record being redefined to represent details for each individual holder.</p>	<ul style="list-style-type: none"> The term “holder” used in the User Technical Documentation is equivalent to the term “Holder” defined in the ASXSORs (noting that there may be more than one Holder for each Holder Record). <p>ASX has sought to keep the terms currently used in ASX rulebooks in place despite the terms used in the User Technical Documentation. Some of these terms, for example the term “Holder Record” is used in the Sponsorship Agreement which would have further ramifications for settlement participants if each sponsorship agreement needed to be updated to reflect a change in terminology.</p> <p>Joint holders</p> <p>CHES today currently records joint holders in relation to a HIN where multiple holder names are provided in the unstructured 180 character free text field currently in CHES, separated by a comma. In the new system, joint holders will continue to be recorded in relation to a HIN, however with the benefit of a structured format that allows for the separate recording of each joint holder.</p> <p>Joint holders are currently and will continue to be taken to be a single member of the relevant company or scheme⁵.</p> <p>The rulebooks also refer in certain circumstances to joint holdings (for example, in the context of the death or bankruptcy of one joint holder). There is a general principle of interpretation under the ASXSORs that the singular includes the plural and vice-versa (see ASXSOR 2.1(c)). Where the term “a Holder” or “the Holder” is used, ASX interprets this as applying to all Holders.</p> <p>In response to feedback received, ASX has decided to delete any tranche 1 rule amendments that introduced the terms “relevant Holder” and “relevant named Holder” to the ASXSORs to avoid confusion. Instead, ASX will rely on the general principle of interpretation outlined above so that references to “Holder” may be</p>

		<p>interpreted to include references to each joint Holder where a HIN has more than one Holder.</p> <p>Inclusive definition of “Holder Record”</p> <p>The definition of “Holder Record” has been designed to specifically refer to all mandatory data elements that must be completed in order for a sponsoring participant to create a HIN, while contemplating that additional non-mandatory information may also be provided at the election of sponsoring participants. The only exception to this in the inclusion, through the definition of “Registration Details”, of “Email Details” which are not mandatory and may be provided optionally by a sponsoring participant in relation to a HIN.</p> <p>ASX considers it is appropriate to include Emails Details in the definition of Holder Record, as if holders choose to receive notifications electronically, an email address should be treated in the same way and subject to the same protections as a postal address under the ASX rulebooks. Additionally, where e-mail details are provided, the relevant “Email Purpose” (i.e. whether those details are provided for communications by ASX only, Issuer only or both ASX and Issuer) which forms part of the Email Details definition, also needs to be identified on a mandatory basis.</p> <p>New draft ASXORs 8.18.12 to 8.18.14 establish the framework for obligations on controlling participants to update Holder Record details where there is a change to those details, consistent with the existing framework for the update of certain Holder Details currently prescribed in ASXSOR 8.18.1 to 8.18.11.</p> <p>Additional information and use</p> <p>Please refer to row [3] above regarding additional information to be maintained in the system and the use of that information. The additional DRP/BSP election and entitlement acceptance and payment information referred to in that row [3] will not form part of the Holder Record maintained in CHES in relation to a HIN, with the record maintained in CHES of the current DRP/BSP election status for CHES holdings to be specific to supporting the new DRP/BSP election service. Where there is a change to the controlling participant for a holding, it is contemplated</p>

Transactions within the system (including provision of holder details) will continue to be limited to authorised participants and other permissioned facility users. Refer to row [54] below for further information on the updating of such information.</p> <p>Indemnities</p> <p>ASX considers the indemnities provided in ASXSOR 8.18.5 (in relation to unauthorised or incorrect requests to changes to Registration Details) and 8.18.14 (in relation to unauthorised or incorrect requests to changes to Holder Record details) remain appropriate, to ensure the validity and accuracy of information about holders in the new system.</p> <p>ASX will consider whether any new indemnities to deal with transition of information from CHES to the new system are necessary as part of transitional rule amendments which are proposed to be consulted on as part of a further consultation.</p>	
6.	<p>Specific feedback on data points</p> <p>Clarify purpose(s) of the new Entity Type and Ownership Type information fields.</p>	<p>The purpose of these two fields is to reflect ISO 20022 messaging structures, which requires identifying information about an object to determine what subsequent information about that object may be required. For example:</p> <ul style="list-style-type: none"> • “Entity Type” identifies whether each holder is an individual or a company. The purpose of recording this information is to enable the new system to determine what additional information about a holder may be recorded, e.g. date of birth or company incorporation date. • “Ownership Type” identifies whether a HIN is held by one holder or jointly by more than one holder. 	How will a client's mobile number be used?	<p>A holder's mobile phone number can be stored in CHES today and will continue to be stored in the new system.</p> <ul style="list-style-type: none"> What's changing: The new system design enables a mobile phone number to be recorded in connection with a HIN, and a separate mobile phone number to be recorded in connection with each holder. For example, for a joint account, there may be one mobile phone number recorded in connection with the HIN, and a separate mobile phone number for each joint holder. The provision of a mobile phone number for both fields is always optional. As there is currently no purpose for the collection of a mobile phone number in connection with a HIN or holder, ASX will be requesting sponsoring participants through the User Technical Documentation that this information is not provided to CHES in connection with Day 1 implementation. Any future use or disclosure of a mobile phone number as part of new system functionality would be addressed through operating rule amendments providing for that functionality and would be consulted on as part of that process. What isn't changing: A mobile phone number may additionally be collected through the new system in relation to an application for mFund products, to provide the unit registry with a contact number for the investor in the event the registry needs to contact the investor, e.g. to clarify information as part of the application process or post investment. Mobile phone numbers are currently collected for this purpose in CHES today. The mobile phone number collected through the mFund application will not be used by ASX for any other purpose. 	N/A
	Why does the new framework for additional non-mandatory data fields to be populated in a Holder Record, namely tax and residency details for	As a result of feedback received through Focus Groups, ASX has decided not to proceed with storing tax and residency details in a holder record for mFund purposes. Noted that this gave preferential treatment to ASX Limited issuers.</p>	<p>settlement participants may continue to provide holder tax and residency details to an issuer through the system (eg by providing those details to an issuer in a message).</p> <p>Reflecting the design of CHES today, tax and residency details that have been passed through the replacement system will not be stored by ASX in a holder record and will not be made available to any system user for reuse.</p> <p>ASX has not sought to extend the issuers to which the additional FATCA/CRS information referred to is provided (e.g. ETFs, LITs or REITs) – based on a lack of customer demand.</p>	
<p>7. Joint holders</p>	<p>How will a Holder Record with more than 3 holders be accommodated if permitted under the Issuer’s constitution?</p> <hr/> <p>Will cause disruption to STP of settlement if brokers forced to support multiple HINs for an account to support both 3 and 4 holders</p> <hr/> <p>How will restrictions on allowing up to 4 joint holders be monitored and enforced (ie which securities allow for 4 holders and which only allow for 3 holders)?</p>	<p>In CHES today, registration details are currently recorded in an unstructured format. This means there is no practical system restriction in CHES on the number of holders that may be identified as holders of each HIN.</p> <p>What the new system seeks to do, is impose a system limitation allowing for the recording of up to four holders in the new system. This reflects specifications for self-managed superannuation funds which allow up to four individual trustees to hold fund assets.⁶ The solution also provides the flexibility to accommodate up to 6 individual trustees for SMSFs, if the Government progresses legislative change to support up to six individual holders – and therefore six individual trustees.⁷</p> <p>Although the new system will allow a participant to record more than three persons as joint holders, the number of joint holders that, under the operating rules, participants will be able to record will continue to be determined with reference to each issuer’s constitution.</p>	

⁶ Self-managed superannuation funds (SMSFs) requirements provide that unless the trustee of the fund is a corporate entity, each member of the fund be a trustee (see Section 17A Superannuation Industry (Supervision) Act 1993. These are also reflected in ATO specifications as out set out in <https://www.ato.gov.au/super/self-managed-super-funds/setting-up/choose-individual-trustees-or-a-corporate-trustee/#Ownershipoffundassets1>). Up to four individual holders are allowed for a SMSF - and therefore up to four individual trustees could hold fund assets.

⁷ We note that the Government introduced a bill to support up to six individual SMSF holders in Treasury Laws Amendment (2019 Measures No. 1) Bill 2019. Although the provisions relating to SMSF membership limits were deleted from this bill before it was passed, the Government noted in Parliament that it continues to support this change to SMSF membership limits and will seek to progress these changes at a later time (see speech of Mr Buchholz, Hansard 2 April 2019, p. 90).

	<p>Number of joint holders allowable should be standardised across issuers by way of Listing Rule limiting all issuers to same maximum number of holders (whether three or four). Alternatively, issuers should be mandated to provide to ASX electronically, details of number of holders allowed under constitution so can be passed through to participants to facilitate automation of processes. Asked for ASX views on any industry progression of reform to align issuer rules to reflect new functionality.</p> <hr/> <p>Will Issuers have to amend their constitution to permit more than 3 joint holders?</p> <p>Will issuers be expected to proactively ensure their constitutions are not contravened? If so, what actions does ASX expect Issuers to take?</p> <p>There are no rules that set out what corrective action must be taken for any holdings that are established contrary to ASXCOR 8.10.1 or 15.7.1</p>	<p>ASX Settlement Operating Rule 8.10.1 currently prohibits a participant from establishing a holding held by more than three persons jointly, unless the issuer's constitution provides otherwise. That is, it is currently possible for issuer constitutions to permit the registration of more than three joint holders (see for example the constitution of BHP Billiton Limited which permits the registration of up to four joint holders).⁸ We have not proposed any rule amendments to this rule as part of the Tranche 1 rule amendments.</p> <p>Where a participant wishes to record more than three joint holders in respect of a holding in an issuer whose constitution allows this, but this is not facilitated in respect of a holding under another issuer's constitution, the participant is required to create separate HINs in respect of those holdings (see part 5.2.3.4 of the existing ASX Settlement Procedure Guidelines). This is anticipated to continue to be the case for the purpose of HINs to be recorded in the replacement system.</p> <p>As ASX has not proposed any change to existing ASXSOR 8.10.1, which leaves it to each issuer to determine whether it will allow holdings held jointly by more than 3 persons. ASX will not at this time be considering amendments to the Listing Rules to mandate that issuers each permit up to either a maximum amount of three or four joint holders.</p> <p>It is up to each issuer to determine whether their constitution should be amended in response to any new regulatory requirements that relate to joint holders (e.g. any requirements regarding self-managed super funds referred to above), and how they wish to monitor compliance with their constitution.</p>

		<ul style="list-style-type: none"> ASX considers it is appropriate to include Email Details in the definition of Registration Details. This is on the basis that if holders choose to receive notifications electronically, the provided email address should be treated in the same way as a postal address under ASX rulebooks, given the importance of protecting this information and ensuring only authorised updates to this information are made. Additionally, where an email is provided, the relevant “Email Purpose” (i.e. whether those details are provided for communications by ASX only, Issuer only or both ASX and Issuer), which forms part of the Email Details definition, also needs to be identified on a mandatory basis. We also consider it appropriate to continue to include Residency Indicator in the definition of Registration Details, given that existing practice and frameworks today around the creation of Holder Records are built around Residency Indicator being included within the definition of Registration Details. <p>If there are other reasons why the definition of Residency Indicator should not be included within the definition of Registration Details, ASX is open to considering any further information provided by stakeholders.</p>

18. Automated Security closure	Noting that there is currently a 20 Business Day window before security position removed in event of lapse, expiry, maturity event. Suggestion that ASX consider reducing this timeframe.	<p>ASXSORs 8.14.1 and 8.14.2 (to which this feedback relate) address the closure and archiving of a subregister. The period of 20 business days is currently provided to give share registries sufficient time to complete any required processing prior to the closure and archiving of the relevant sub-register. ASX has also received feedback indicating that reducing the 20 business day window would put additional strain on issuer registries in performing the necessary administrative functions prior to archiving.</p> <p>Accordingly, ASX does not propose to require changes to existing share registry processes and timeframes in relation to this specific functionality as a result of the replacement of CHES.</p>	N/A
	Noting concerns surrounding potential for changes to Rule 8.14.2 to impose additional costs and burdens for Issuers regarding requirement to issue CHES holding statements to holders	<p>As noted in the Tranche 1 Consultation Paper, Rule 8.13.1(a) currently prohibits ASX from closing a subregister except in accordance with the Rules. The purpose of the proposed amendment to ASXSOR 8.14.2 aims to more closely align the archiving process described under Rule 8.14.2 with the requirements of ASXSOR 8.13.1 by expressly providing within Rule 8.14.2 for the relevant closure of the sub-register as part of that archiving process.</p> <p>This proposed change, including the express provision of notification to Issuers, is considered an enhancement of existing rules and functionality in the scenarios covered by ASXSOR 8.14.2 and better supports existing processes.</p> <p>Under ASXSOR 8.20.1, where there is an addition to or deduction from a holding, ASX must send a CHES holding statement to the holder. 		<p>notes to ASXSORs 8.14.1 and 8.14.2, ASX Settlement will not ordinarily archive a CHESSE subregister if a CHESSE holding is recorded on the CHESSE subregister. It is not a present requirement for archiving a CHESSE subregister under ASXSOR 8.14.2 (e.g. for a lapse, expiry or maturity of financial products) that such a reduction of a holding balance to zero occurs. Accordingly, this means that a reduction of holdings to zero that occurs as part of the archive process, which may not otherwise occur today, would lead to the issue of further CHESSE holding statements. As part of its further work on CHESSE holding statements, ASX will consider whether to suppress the production of holding statements where the only transaction in the relevant month was the reduction of a holding to zero in the circumstances referred to in ASXSOR 8.14.2 (i.e. the archive of a CHESSE subregister as a result of a financial product that had lapsed, expired, matured etc).</p> <p>Additionally, ASX has been working with industry to implement electronic delivery of CHESSE holding statements reducing costs for issuers and delivering a more contemporary service to investors. This includes working with settlement participants to collect email contact details from investors who have consented to delivery of CHESSE holding statements electronically.</p>

22. Participation structures	Requested further details on separation of CS functionality post Day 1	As indicated in the April 2018 Consultation Paper, changes to clearing and settlement participation structures including separation of entities performing clearing and settlement functions has been deferred to post Day 1 as it raises various impacts requiring further consideration. Accordingly, no additional details on such separation are available at this stage.	N/A
23. ASX Clear determining to remove Cash CCP Transactions from set off	<p>What is a reasonable use of ASX's powers in removing cash CCP transactions from set off (suggests examples included in a GN or procedure)?</p> <hr/> <p>Requested guidance on examples of scenarios where ASX Clear would remove transactions from settlement.</p>	<p>The introduction of ASXCOR 12.7.3 should be considered alongside the removal of block indicator functionality (see row [21]), which currently permits a clearing participant to request that certain Cash CCP Transactions are excluded from set off.</p> <p>The new ASXCOR 12.7.3 provides a fall back option, giving ASX Clear the ability to remove Cash CCP Transactions from set-off if the conditions of this rule are met (i.e. that it is necessary to maintain the orderly operation and integrity of ASX Clear).</p> <p>One example where ASX Clear may seek to use this power is if netting for a corporate action should have been turned off, but was not done so correctly. This power would enable ASX Clear to remove Cash CCP Transactions from set-off that should not have been included in set-off.</p> <p>As indicated in row [24] below, this does not involve removal of transactions from settlement, only from the netting process at the clearing house.</p>	N/A
24. Specific drafting queries	Requested clarification on types of transactions that can be excluded from settlement in relation to proposed amendments to ASXCOR 12.7.3A and 12.7.4 (set out in row 34 of the Summary of Changes table).	The Technical Documentation sets out the types of transactions that are ineligible for netting. ¹¹ We note that the amendments described in row 34 of the Summary of Changes table do not provide that transactions are excluded from <u>settlement</u> , only that these transactions are excluded from netting. An example of a transaction excluded from netting is a transaction with a settlement cycle of less than 2 business days.	N/A

	<p>Query amended drafting to ASXCOR 12.6.2.</p>	<p>ASX will not be proceeding with the proposed amendments to ASXCOR 12.6.1 or 12.6.2. ASX previously sought to make this amendment to clarify that in the new system, Cash CCP Transactions will be netted per basis of movement (in addition to per HIN and security per existing functionality).</p> <p>Instead of making the proposed change to ASXCOR 12.6.1 and 12.6.2, ASX has clarified by way of a note to ASXCOR 12.6.1 that for the purpose of determining net delivery or payment obligations and entitlements in respect of class of financial products, regard will be had as to whether a financial product is to be transferred with or without the relevant entitlement. This reflects that financial products can be transferred with or without an entitlement during an ex period (see definition of “Parent Financial Product” in the ASXSORs).</p> <p>ASX modelling indicates it will be unlikely that financial products will need to be netted per basis of movement. However, one possible scenario is in relation to transactions in a special market with an extended ex-period which although occurring after the ex-date, continue to carry an entitlement and are therefore netted separately to transactions on that day which do not carry the relevant entitlement.</p> <p>The system has also been flexibly designed to accommodate future changes which may require financial products to be netted per basis of movement, for example future changes to settlement intervals or standard ex-periods.</p>	<p>ASXCOR 12.6.1 and 12.6.2.</p> <p>ASXCOR Procedure 12.6.2</p>

This is considered preferable to relying on post transfer checks by the relevant participant. Refer to row [31] below for further information on this and other standardisation and efficiency reasons for this change.</p>

What is impact on these BAU changes of CHES replacement?</p>	<p>The process for transfers to the CHES subregister under the BAU rule amendments introduced 18 December 2019 will be replaced with the Tranche 1 rule changes. The final version of the rules will be marked up against those BAU rule amendments.</p> <p>The BAU rule amendments introduced separate pre and post transfer processes for a sub-class of settlement-only participants (custodial settlement participants) so that they would no longer be required to provide paper transfer documents in order to effect an issuer sponsored to CHES holding transfer. They did not otherwise change processes for other settlement-only participants (for which such paper transfer document processing requirements continued) or settlement participants that were also market participants.</p>	<p>N/A</p>

	<p>BAU rule changes should be retained and ASX should not proceed with changes regarding transfers to the CHESSE Subregister under Tranche 1 rule amendments, including having regard to exposure of issuers from settlement participants.</p>	<p>The proposed Tranche 1 rule amendments replace the:</p> <ul style="list-style-type: none"> - specific pre and post transfer processes introduced above for custodial settlement participants as part of the BAU rule amendments; - existing paper transfer document validation processes for other settlement-only participants and for issuers and their share registries in respect of the processing of transfers by such participants; and - existing post validation steps by settlement participants that are market participants. <p>These changes create greater efficiencies across participants, issuers and their share registries by aligning the processing of transfers across all settlement participants and by removing manual paper based processes.</p> <p>As indicated in row [30], the proposed Tranche 1 rule amendments also involve additional pre-transfer validation processes across all participants, with issuers to check that the holder registration details included in a request to transfer holdings match the registration details maintained by the issuer for that holding prior to processing the transfer. This pre-transfer validation helps support investor protections by preventing transfers of securities where the details for those holdings do not align with the Issuer's records. This also aligns the processing of transfers with existing processing of conversions.</p> <p>Participants will also remain liable under existing warranties provided to certain persons (including issuers and holders) under the Corporations Act that they are authorised by the transferor to effect the transfer, and indemnities if they are not so authorised¹².</p>

Issuers are expected to be able to leverage existing internal matching tools/criteria for validating conversions in connection with the extension of such validation requirements to transfers.</p> <p>ASX is however taking steps to enhance alignment of registration details recorded by participants and issuers and also to enable identification of differences in registration details recorded prior to a transfer request. As indicated in row [4] above, the User Technical Documentation will be supplemented (anticipated by end May 2020) with additional information on the standardised format for providing and recording holder registration details, including to outline the standards to be used for creating accounts and holders in CHESSE.</p> <p>This will also help issuers and their registries to align their recording of registration details on the Issuer Sponsored Subregister with such format, thereby avoiding such mismatch at the validation stage.</p> <p>SRN enquiry functionality being formalised in rule amendments (including issuer obligations to process such requests) will also support clarification of registration details prior to transfer.</p>

34. Use of functionality	Request for confirmation whether SPs be required to use the RTGS functionality to settle bilateral transactions outside of batch? Request for use cases to be provided.	<p>It will be optional for Settlement Participants to use the new bilateral demand settlement transfer functionality, and so the use RTGS functionality is optional. Existing alternatives to the bilateral demand settlement transfers will remain available after Day 1, including bilateral batch settlement and bilateral demand transfers which involve transfers of securities occurring within CHES but settlement of payments outside CHES.</p> <p>If a Settlement Participant however elects to use the new bilateral demand settlement transfer functionality, then settlement using RTGS will apply.</p> <p>ASX expects that the use case for this new functionality will be relatively broad depending on participant needs, but one example includes a situation where an instruction has not been received from a client by the time of batch processing to support settlement with that client on a DvP basis within batch, in relation to a client market transaction being settled on that day. In that example, a Participant may elect to use the new bilateral demand transfer settlement functionality to still achieve DvP settlement with the client on that day in respect of that market transaction.</p>	N/A

36. Settlement tolerance override amount	<p>Disagrees with proposal to restrict participants from setting a limit within a settlement instruction that is less than ASX default tolerance level. Requested further information on rationale.</p> <p>ASX does not currently reject tolerance on a trade sent by a participant which is below the ASX default amount. Requested further clarification</p>	<p>The purpose of new settlement tolerance override amount functionality is to reduce the risk of non-matching where the relevant needs and tolerances of Participants require greater flexibility.</p> <p>The proposed ASXSORs reflect the current position in CHES, i.e. the lower tolerance levels determined by ASX Settlement in accordance with the ASXSORs based on the size of the transaction, while also allowing for participants to override this ASX default tolerance amount (i.e. Settlement Amount Tolerance) with a higher value.</p> <p>ASX also notes that under the new system, the Settlement Amount Tolerance will be updated to a tiered tolerance, which will scale with the size of the relevant transaction.</p> <p>As indicated above, the intention of the new functionality is not to enable Participants to specify narrower settlement tolerances, thereby increasing the risk of increasing non-matches. As discussed in the Focus Group¹³ for this functionality, the focus of the settlement tolerance override amount is to allow Participants more flexibility and greater match certainty by permitting wider tolerances than those specified by ASX. ASX notes that permitting narrower settlement tolerances than those specified may increase the risk of instructions not matching and cause a degradation in the settlement process.</p> <p>While the current CDE Testing environment does not reject a tolerance entered below the Settlement Amount Tolerance, these are effectively processed as no tolerance, as anything lower than that tolerance is currently processed using the default settlement tolerance amount.</p>	N/A

37. Cut off times	Query whether procedures will specify cut off times for processing immediate bilateral instructions	ASX notes this feedback. This issue is currently under consideration, including as to the form of further information to be released regarding processing cut-off times. 38. Message and instruction naming	Discrepancy between Procedure 9.4.1 and 10.9.11 (which says FOR flag is required) and functional specs (which say FOR is not required). Should FOR line be removed from Procedure 9.4.1 and 10.9.11?	<p>ASX will amend ASXSOR Procedures 9.4.1 and 10.9.11 to remove the references to FOR.</p> <p>By way of additional background, the FOR message field is being removed for unilateral transfers only as the relevant Participant controls both HINs in relation to the relevant message, and so unlike a bilateral transaction, the participant is aware of the foreign status of both sides to the relevant message. Consequently the FOR field is redundant in the unilateral context.</p> <p>Existing procedures to ensure that foreign holders can continue to be identified are not being changed as a result of this data field modification. For example, ASXSOR 6.3.4(b) retains the obligation on participants to establish a dedicated settlement account with a Residency Indicator “F” to facilitate foreign to foreign allocations and ASXSOR 8.7.3 retains the obligation on participants to establish a holder record with the appropriate Residency Indicator “F” for any holding of FOR financial products, with ASX providing issuers with net domestic and foreign movement information on a daily basis.</p>	ASXSOR Procedures 9.4.1 and 10.9.11.
39. Trust amount – consolidated Unilateral Batch Instruction	Discrepancy between Procedure 6.3B.4 (which say Client Trust Deductible Amount must be zero or negative) and user technical documents/functional specs (which say all values as unsigned amounts, with debit or credit flag indicating direction).	<p>Procedure 6.3B.4 seeks to impose a rules based obligation regarding how to account for a Client Trust Deductible Amount. Consequently, the concept is defined as a negative amount, given the reuse of the same message as for Client Trust Receivable Amount which would be accounted for as a positive amount (as per Procedure 6.3B.2 and 6.3B.3).</p> <p>In the new system, the relevant Client Trust Deductible Amount must be a negative amount. In practice, this may be distinguished by the application of a DBIT or CRDT value to differentiate negative from positive. <p>40. Demand Locks</p>	<p>How will units in a target holding receive an adjustment upon completion of Demand or Settlement transfer?</p>	<p>The demand lock functionality will only be used when a Bilateral Demand Transfer or Bilateral Demand Settlement Transfer is initiated. That lock will only remain in place until the performance of the transfer (on the day imposed), subject to earlier removal of the lock in accordance with proposed Rule 9.5.9 or 9.5A.9 (as applicable).</p> <p>In practice, a key example where holdings may be adjusted in a manner relevant to the question is in the case of a Reconstruction. As noted below in row [43], once an Issuer has initiated a Reconstruction, ASX Settlement will remove all Settlement Locks and Demand Locks (as applicable) from all Holdings in the relevant financial product – refer to draft Rule 8.26.1 as part of the Tranche 2 rule amendments¹⁴. This occurs prior to the issuer initiating a Holding Adjustment or Financial Products Transformation to give effect to the Reconstruction. Settlement Locks and Demand Locks are not reapplied by ASX Settlement post the Reconstruction.</p> <p>Once the demand or settlement transfer has occurred, Holding Adjustments and Financial Product Transformations will continue to be able to be processed.</p>	
	<p>Issuers should also be similarly indemnified as under ASXSOR 8.15.24 in respect of Demand Locks due to the risks presented by the restriction on Issuer corporate action processing.</p>	<p>Demand lock functionality is an automatic feature of the Bilateral Demand Transfer and Bilateral Demand Settlement Transfer functionality in the new system.</p> <p>These locks apply to prevent movement of securities to increase operational certainty for transactions in the new system and have limited duration (i.e. for demand locks, the performance of that transaction on a demand basis on that day).</p>	<p>N/A</p>

¹⁴ The changes made to rule 8.26.1 under the tranche 2 rule amendments replace the changes to 8.15.20 proposed under the tranche 1 rule amendments, providing greater clarity to the process and timing for removal of such lock in the case of a Reconstruction.

Issue	Feedback	ASX response	Rule changes
<p>Given this, an equivalent indemnity to ASXSOR 8.15.24 (which applies to settlement locks) is not considered appropriate for demand locks.</p> <p>Refer also to row [44] in relation to why the indemnity under ASXSOR 8.15.24 for settlement locks does not extend to Issuers.</p>

		<p>holding adjustment to decrease/increase the number of financial products in a holding.¹⁵ Although the scope of the exceptions to the processing of holding adjustments and financial product transformations is being amended in the new system, the concept of there being exceptions to the processing of these requests is not new.</p> <p>If an issuer wishes to initiate a holding adjustment or financial product transformation that is <u>not</u> a reconstruction in connection with locked securities, an issuer can discuss this with the relevant controlling participant, holder or ASX Settlement to establish an appropriate way forward. This discussion enables the purpose for which a lock was originally applied (e.g. the terms of any applicable court order) to be taken into consideration, rather than the system providing for the automatic processing of these requests which would not recognise the original purpose for which a lock was applied.</p> <p>Practically, the rules provide mechanisms by which holder record locks, holding locks, demand locks and settlement locks can be removed, which may allow the removal of a lock if the outcome of discussions between an issuer and the relevant party determines that this is appropriate.¹⁶ We also note we have proposed a further rule amendment in row 46, which provides that settlement locks will be automatically removed if securities are suspended (eg if securities are suspended in connection with a merger event). This automatic removal of settlement locks</p>	

¹⁵ A reconstruction is defined in the ASX Settlement Operating Rules as being an alteration to the issued capital of an issuer which affects the number or nature of financial products held by a holder. We note that ASX proposes making a further rule amendment as part of Tranche 3 to the definition of “reconstruction” to remove reference to a “merger”, to ensure that the definition of reconstruction applies to an adjustment in share capital that relates to one entity (rather than a merger, which necessarily relates to more than one entity). This change will be described in a future consultation paper for stakeholder feedback.

¹⁶ **Holder record locks:** Settlement participants have the power to request that holder record locks are removed at their request (see ASX Settlement Operating Rule 8.16.3A (Tranche 1 rule amendments)).

Holding Locks: An issuer may request that ASX Settlement remove a holding lock (see ASX Settlement Operating Rule 8.16.1 (Tranche 1 rule amendments)). Please note that settlement participants cannot impose holding locks.

Settlement locks: Settlement participants have the power to request that settlement locks are removed at their request (see ASX Settlement Operating Rule 8.16.6 (Tranche 1 rule amendments)). ASX Settlement also has the power to remove a settlement lock at any time to maintain the orderly operation and integrity of the Settlement Facility. If an issuer or a participant requested ASX Settlement to remove a settlement lock in order to facilitate the processing of a holding adjustment or financial product transformation, ASX Settlement could consider relying on this power to give effect to that removal (see ASX Settlement Operating Rule 8.16.8 (Tranche 1 rule amendments))

Demand Locks: ASX Settlement has the power to remove a demand lock at any time to maintain the orderly operation and integrity of the Settlement Facility. If an issuer or a participant requested ASX Settlement to remove a demand lock in order to facilitate the processing of a holding adjustment or financial product transformation, ASX Settlement could consider relying on this power to give effect to that removal (see ASX Settlement Operating Rule 8.16.8 (Tranche 1 rule amendments)).

		<p>means that a settlement lock will not restrict an issuer from initiating a holding adjustment or financial product transformation in order to give effect to certain corporate events while the relevant security is suspended.</p> <p>An issuer seeking to give effect to a reconstruction will be able to do so despite any locks that may apply to the affected securities. ASX determined it was appropriate for reconstructions to be given effect to as a reconstruction is not expected to affect the value of securities, only the number of securities on issue (e.g. due to a share consolidation). The treatment of locks in a reconstruction scenario depends on the type of lock.¹⁷</p>	
	<p>Request clarification that ASX notify Issuers for non-applied adjustments or Transformations for locked holdings</p>	<p>An issuer will have access to both a “Total Balance” and “Available Balance” for each HIN. The difference between these two balances will be securities that are subject to any type of lock (e.g. demand lock) or subposition (e.g. in favour of ASX Clear for securities provided as Cover for margin obligations or in favour of a Participant Bidder for securities accepted into a takeover bid).</p> <p>Using this information, an issuer will have visibility as to the number of available securities for performance of transactions or other processes in the system (e.g. a holding adjustment or financial products transformation).</p> <p>In the event an issuer sends a message requesting a holding adjustment that will decrease the number of securities in a HIN by more than the available balance, that holding adjustment message will be rejected.</p>	N/A

¹⁷ **Demand locks** and **settlement locks** are automatically removed by ASX Settlement when it receives notification of the reconstruction (see ASX Settlement Operating Rule 8.26.1 (Tranche 2 rule amendments)). These locks are not reapplied post the reconstruction.

Holding locks and **holder record locks** will not prevent a holding adjustment or financial product transformation that relates to a reconstruction from taking place. Holding locks and holder record locks will remain in place post the reconstruction to the newly reconstructed security balance (or in relation to a holding lock, in the same ratio as the holding lock applied prior to the reconstruction).

As indicated above in this row 43, reconstructions will be given effect to despite any locks that may apply to the affected securities.</p> <p>If an issuer transmits a message to initiate a holding adjustment or financial product transformation and there is an insufficient available balance for the HIN to give effect to the request, the message will be rejected.</p>	
44. Indemnity	<p>Include the Issuer as a party indemnified by the Participant under ASXCOR 8.15.24.</p> <p>Provide indemnity in respect of Settlement Locks and Demand Locks</p>	<p>These locks apply to prevent movement of securities to increase operational certainty for transactions in the new system and have limited duration (i.e. for settlement locks, during the T+2 settlement cycle and for demand locks, the performance of that transaction on a demand basis on that day).</p> <p>New ASXSOR 8.15.24 reflects the indemnity provided by a participant under ASXSOR 8.15.16 in relation to a Holder Record Lock, which is for the benefit of ASX Settlement and a Holder. In introducing this new indemnity, we have sought to reflect the scope of existing indemnities as they relate to locking functionality. For this reason, proposed new ASXSOR 8.15.24 does not extend to issuers.</p>	N/A
45. Settlement Locks for accumulation to settlement to settlement entrepot	Will settlement locks be mandatory for accumulation to settlement entrepot movements? Functional specs say locking as optional on Unilateral Settlement Instruction	<p>Yes, the settlement lock will be automatically applied to movements from an accumulation account to a settlement entrepot account.</p> <p>In a footnote to the User Technical Documentation (see *)), it is noted that for unilateral settlement instructions where the delivering account is an accumulation account and receiving account is a settlement entrepot, a settlement lock will be applied automatically.¹⁸</p>	N/A
46. Further rule amendment by ASX	NA	<p>ASX has made a further rule amendment to ASXSOR 8.5.1 to clarify that where a class of an issuer's financial products are suspended by ASX Settlement, ASX Settlement will remove all Settlement Locks in place in relation to the suspended financial products.</p> <p>ASX Settlement will not automatically reinstate these locks following suspension, however a participant may request that a settlement lock is re-applied post</p>	ASXSOR 8.5.1

<p>suspension in connection with unilateral and bilateral batch instructions (see ASXSOR 8.15.21). Settlement locks will not be automatically reapplied by ASX, as ASX considers that settlement participants are best placed to determine the settlement obligations or requirements after a suspension has been lifted.</p> <p>In the case of such suspension of a class of financial products, all Instructions that have already been received in respect of such financial products are also suspended and any new Instructions or Messages received are rejected. It is not considered appropriate that Settlement Locks persist in that scenario.</p>			
<p>Ad hoc changes (see row 68 of the table in Attachment A of our Tranche 1 Consultation Paper)</p>			
<p>47. Emergency assistance</p>	<p>Requested use cases about how this assistance would be provided</p>	<p>The new Emergency Assistance rules provide a framework for a participant to request assistance from ASX Settlement, reflecting an existing framework under the ASX Clear Operating Rules. The intention is for ASX Settlement to provide assistance to a settlement participant in the event they are experiencing a connection issue (e.g. in the event a participant is unable to connect to CHES).</p> <p>The rules framework provides that a participant may request assistance from ASX Settlement to send and receive messages and to make available other emergency facilities. As it is difficult to predict what type of emergency assistance a participant may require in the future, the draft rules are not prescriptive on the type of other emergency facilities that may be provided by ASX Settlement in response to a request for assistance.</p> <p>This functionality has been used previously, for example by a Payments Provider during the Martin Place siege when they were unable to connect to CHES.</p>	<p>N/A</p>
<p>Miscellaneous/other</p>			
<p>48. Old terminology</p>	<p>Old terms have not been replaced with terms across all of the rulebooks (e.g. dual to bilateral)</p>	<p>The replacement of such terms across the rule books is to be addressed through further consultation on the rule amendments covering the Tranche 3 rule amendments. For purpose of Tranche 1, it was sought to limit such general changes to rules that were changing in that tranche.</p>	<p>N/A</p>

49. Optional vs mandatory functionality	What is approach for mandatory v optional and how will ASXSOR reflect optional period (including in relation to breach of rules)?	Aspects relating to timing for enlivening rules providing for new functionality will be addressed as part of transitional rule amendments for the new system which are proposed to be consulted on as part of a further consultation. 50. APGs	Status of APGs	<p>The APG will be fully replaced by the User Technical Documentation available through the CHES replacement wiki.¹⁹ The User Technical Documentation will consist of:</p> <ul style="list-style-type: none"> • Functional Specifications which detail the business overview, the business processes, business rules and validations plus the ISO 20022 messages. The Functional Specifications for the tranche 1 rule amendments are available on the CHES replacement wiki. • Operational procedures and guidelines, the release of which commenced in April 2020. The purpose of this document is to provide guidelines for participants, issuers and registries to assist them to develop internal procedures that suit their business and internal systems and is modelled on the previous ASX Settlement Operational Procedure Guidelines. ASX expects this will be released in tranches, similar to the approach taken to date in publishing the Functional Specifications, with ASX endeavouring to release the final tranche so as to be available by end 2020. <p>The equivalent of the EIS will be the messaging section of the User Technical documentation.</p>	N/A
51. User Technical Documentation	Requested confirmation that that 'Functional Specification' posted on wiki is the User Technical Documentation.	Yes, the "Functional Specifications" available on the CHES replacement wiki will form part of the "User Technical Documentation". See also response for row [50] above. The "Functional Specifications" across almost all of the Day 1 functionality for the new system on Day 1 have now been published (with only two outstanding ISO messages related to default management ²⁰). The publication of the last Functional Specifications occurred on 2 April 2020. ASX will refine and review the	N/A

²⁰ The Functional Specifications for these two outstanding messages are anticipated to be released mid-year

Issue	Feedback	ASX response	Rule changes
	<p>Release of functional specifications is occurring in tranches and does not appear to be aligned with rules tranches</p>	<p>Functional Specifications content based on market feedback and questions. Where revisions are updated, these are clearly highlighted in the release notes and top of each page.</p> <p>The consultation paper for each of the tranches identifies the relevant Technical Documentation covered by each of the rule amendments in that tranche.</p> <p>Refer also to row [56] regarding the approach to groupings of rule amendments into three tranches.</p>	
<p>52. Fees/processes</p>	<p>Wanted further detail on fees / processes, which may influence nature of capital raising and record keeping (e.g. CHES holding statements and their reissue when required).</p>	<p>As indicated in row [18], ASX has been working with industry to implement electronic delivery of CHES holding statements, reducing costs for issuers and delivering a more contemporary service to investors.</p> <p>Fees are not currently addressed under the ASX rulebooks, and so have not been consulted on part of this Tranche 1 rules consultation.</p>	<p>N/A</p>
<p>53. CHES holding statements</p>	<p>Supports process involving opting to move to online communications preference and noted 'there is a place for hard copy documents' where users access to technology is limited.</p>	<p>CHES holding statements are not addressed in the tranche 1 amendments. As per the April 2018 Consultation Paper, movement to electronic CHES holding statements and notifications is proposed to be on an opt-in basis. As a practical matter, the provision of such statements and notifications will be dependent on receiving a holder's email address, in addition to the registration details currently provided by settlement participants when establishing a CHES holding. If an investor wishes to receive communications from ASX electronically, their settlement participant can communicate this election to ASX via CHES at the time of providing such email details.</p> <p>As indicated in row [18], ASX has been working with industry to implement electronic delivery of CHES holding statements, including working with settlement participants to collect email contact details from investors who have consented to delivery of CHES holding statements electronically. This includes for the purpose of facilitating electronic CHES holding statements prior to the introduction of the new system.</p>	<p>N/A</p>

Issue	Feedback	ASX response	Rule changes
54. Rectification of errors	<p>Process should exist for rectifying or preventing errors by shareholders operating without facilitation by full service stockbroker.</p>	<p>Information will continue to be updated in the new system as at present for CHESSE. Transactions within the system (including provision of holder details) will continue to be limited to authorised participants and other permissioned facility users.</p> <p>It is not proposed that holders will be able to directly transact with the new system to change their own details. Where such changes to holder details are required, e.g. for change of address, this will be required to be performed by the sponsoring participant for that holder from whom such details are sourced and who are required by law to carry out KYC on investors before transacting on their behalf, which is generally carried out at the on-boarding stage before a HIN issued.</p>	N/A
55. Messages	<p>New system will involve several linked messages rather than one complete message per transaction.</p> <p>Structure of communication is no longer apparent on face of Rules, with Rules seeking to fit new node access structure.</p>	<p>The new system will adopt ISO 20022 messaging, which is not a ‘like for like’ with CHESSE messages, meaning that for some transactions, multiple messages are required which will be ‘linked’ (e.g. for transfers). This reflects the separation under ISO 20022 of messages containing holder details (static data) and transfer/conversion/enquiry requests (transaction data).</p> <p>These changes are not related to the introduction with the new system of a Ledger API or “node” connectivity channel. Facility users will continue to transact in the new system and receive reporting via “Messages” that are “Transmitted”, regardless of the connectivity channel a user chooses to access and interact with the new system.</p>	N/A
56. Tranches of rule amendments	<p>Lack of regulatory certainty without comprehensive rule package. Rule making process is not structured in a manner that provides full transparency to enable users and other stakeholders to understand their obligations and the operation of the new system.</p> <p>BAU changes for transfers to CHESSE Subregister not shown in rules.</p>	<p>Rules consultation process</p> <p>The consultation process for the rule amendments for the new system has been designed to be responsive to stakeholder requirements.</p> <p>ASX has sought to deliver draft rules to the market at the earliest possible time, rather than waiting until all draft rules are available. This is being done in a logical way, with draft rules to be issued in three tranches grouping related sets of rules which also reflect the logical development of clearing and settlement aspects.</p>	N/A

Issue	Feedback	ASX response	Rule changes
		<p>Key drivers for this approach and the timetable for the release of the rule amendments for consultation were the:</p> <ul style="list-style-type: none"> the ongoing iterative solution design process which involves feedback from focus groups and the ISO 20022 technical committee, with the final form of the solution being a key input to the detailed rules analysis and implementation process that follows; the objective to complete the rule amendment regulatory clearance process at least 6 month prior to go-live to provide industry certainty well in advance of go-live, including so that any necessary operational processes can be put in place to ensure compliance with the rules. <p>The consultation packages also seek to make it as easy as possible for stakeholders to find what they are looking for, and to understand the intended purpose of each rule change. The consultation packages are also provided under a published timetable which is in accordance with best practice. ASX considers that this process will make it easier for customers and other stakeholders to navigate and consider the draft rule amendments.</p> <p>The tranche 1 draft rule amendments (covering accounts, participants, securities and pre-settlement aspects for the new system), which are the subject of this response to consultation feedback, were released for public consultation on 15 November 2019.</p> <p>The tranche 2 draft rule amendments (covering corporate actions, mFund and RTGS payment aspects for the new system) were released for public consultation on 21 February 2020²¹.</p> <p>As indicated in ASX's media release on 25 March 2020, consultation on the tranche 3 rule amendments (covering settlement, reporting and other miscellaneous aspects for the new system), which was due to have been released on 6 April 2020, has been suspended until after the June consultation on the new</p>	

²¹ As indicated in ASX's [media release](#) on 25 March 2020, the consultation period for the tranche 2 rule amendments, which was due to conclude on 3 April 2020, has been extended to 29 May 2020.

		<p>CHES replacement implementation timetable. This was in recognition of the unfolding COVID-19 pandemic and the impact on stakeholders.</p> <p>As indicated in the consultation paper for the tranche 2 rule amendments, ASX was also considering options for further consultation on the consolidation of the draft rules package across the three tranches of rule amendments.</p> <p>The process for further consultation on the rule amendments will form part of that June consultation on the new CHES replacement implementation timetable.</p> <p>BAU rule amendments</p> <p>The transfers to the CHES subregister BAU rule changes came into effect on 18 December 2019, which was after the release of the consultation paper for the Tranche 1 rule amendments on 15 November 2019. Accordingly these were not shown in the Tranche 1 rule amendments - which reflected amendments to the ASXSORs as applied at the time of the release of that paper.</p>	
57. Consultation process	<p>Consultation inappropriately undertaken by ASX Limited (should be ASXC or ASXS).</p> <p>Rules are too generally worded.</p> <p>Lack of precise links between consultative text and proposed rules</p>	<p>The consultation paper included the standard address details for the Office of the General Counsel, which supports all licenced entities in the ASX group. This includes coordinating and supporting rule change and consultation processes for the CS facilities operated by ASX Clear and ASX Settlement (as is currently the case).</p> <p>The rule amendments are focussed on clearing and settlement aspects under the ASXCORs and ASXSORs and also include one amendment under the ASXORs. Accordingly, the consultation is being undertaken by each relevant CS facility (ASX Clear and ASX Settlement), and in the case of the one ASXOR change, by ASX as market operator.</p> <p>Provision of the change to the ASXORs as part of the consultation on the Tranche 1 rule amendments supports early transparency to the market and other market operators of contemplated changes to the operating rules of the ASX market in connection with the replacement of CHES.</p>	N/A

Issue	Feedback	ASX response	Rule changes
		<p>The consultation paper includes links to the specific Technical Documentation and Summaries for Focus Groups and Technical Committee meeting feedback for each functional element addressed through the rule amendments (as applicable).</p>	
<p>58. Competition</p>	<p>CP doesn't:</p> <ul style="list-style-type: none"> • identify areas that that may impact on competition • identify areas where rules are being made pursuant to CS licence <p>Proposed services for issuers may impact division of investor and issuer sub-register functions.</p>	<p>The consultation on the rule amendments identifies rules being amended in connection with the new system and also provides an explanation of those changes, including the purpose. This allows for feedback from users and other stakeholders on the relevant impacts (including unintended consequences on competition).</p> <p>The rule amendments deal with changes to the ASXSORs, ASXCORs and ASXORs. This is expressly dealt with throughout the consultation paper, the Summary and each of the Attachments setting out the changes to those rules. Where the rules being amended are ASXCORs and ASXSORs, the provisions under Part 7.3 of the Corporations Act dealing with the licensing of CS facilities apply. The consultation for the rule changes is being undertaken by each relevant CS facility (ASX Clear and ASX Settlement) in relation to their respective operating rules.</p> <p>It is not clear which new issuer services the feedback on impact to sub-register functions refers to. If this is referring to new functionality for the electronic notification through CHES of DRP/BSP elections and electronic notification and payment through CHES of entitlement acceptances, these are addressed as part of the Tranche 2 rule amendments released for consultation on 21 February 2020. These represent new business requirements generated through industry consultation processes in 2017 and 2018.</p>	<p>N/A</p>
<p>59. Preferential treatment</p>	<p>Preferential treatment to ASX Limited clients over competitors of ASX Limited, including Chi-X, in connection with framework for additional tax and residency details to be populated in a Holder Record for mFund.</p>	<p>mFund is a settlement service and is not a market. It does not involve the quotation of mFund issuer products on the ASX market.</p> <p>When mFund was established issuers requested functionality in relation to reporting under the US Foreign Account Tax Compliance Act. This was subsequently extended to the include functionality in relation to the Common Reporting Standard. As part of CHES replacement, ASX is modifying existing system requirements, which already provide for the capture of all required investor and tax residency details for mFund products. As noted above, these</p>	<p>N/A</p>

Issue	Feedback	ASX response	Rule changes
	<p>Chi-X does not have access to an issuer portal.</p>	<p>changes merely modify existing system requirements, and have not resulted in any Rule amendments.</p> <p>Chi-X holds a licence to operate a market and is not licensed to operate a CS facility (e.g. for the purposes of operating a settlement service such as mFund).</p> <p>ASX has not sought to extend the issuers to which the FATCA/CRS information is provided (e.g. ETFs, LITs or REITs). This is based on a lack of customer demand.</p> <p>Chi-X is not an Issuer for which the Issuer portal is applicable.</p>	
60. Deferral	<p>ASX should consider a 9-12 month deferral in project implementation.</p>	<p>As indicated in ASX's media release on 25 March 2020, ASX will consult on the implementation timetable for the CHES replacement system. This is due to the unfolding COVID-19 pandemic. It is also in response to user feedback on timing, requested functionality changes, and the need for ASX to complete aspects of its own readiness.</p> <p>In June, ASX will seek user input on the new schedule that will move the go-live date from April 2021 to a later date. In the meantime, the target of opening an Industry Test Environment (ITE) in July is retained.</p>	N/A

Attachment B: Overview of further tranche 1 rule amendments following consultation feedback

Tables 1 to 4 below set out the changes ASX is making to the tranche 1 rule amendments following consultation feedback. Changes are proposed to the ASX Settlement Operating Rules (see Table 1), ASX Settlement Operating Rule Procedures (see table 2), ASX Clear Operating Rules (see Table 3) and ASX Clear Operating Rule Procedures (see Table 4). No further changes are proposed to the ASX Operating Rule Procedures as a result of consultation feedback.

- The column “Change proposed in Tranche 1 Consultation Paper” shows the original rule amendments (marked up against the existing rule).
- The column “Revised change following Tranche 1 feedback” shows the revised mark-up proposed to the rule (also marked up against the existing rule). Where there has been changes to a rule or text that was introduced as part of the tranche 1 consultation paper, ASX has made the further change clear in this column by highlighting any further revisions in **yellow** highlight.

6.3B.3 Transfer of Financial Products from a CHESS Holding (other than Accumulation Account) to Settlement Account

Subject to Rule 6.3B.7, in order to Transfer Financial Products from a CHESS Holding (other than its Accumulation Account) to its Settlement Account in connection with the sale of Financial Products under a Cash Market Transaction, a Settlement Participant must Transmit a Valid ~~Single Entry~~ Unilateral Batch Message that contains the Client Trust Receivable Amount in respect of those Financial Products, in the manner set out in the Procedures.

If there are sufficient Available Financial Products in the CHESS Holding (having regard to other Batch Instructions affecting the CHESS Holding scheduled for settlement on or prior to the relevant Settlement Date) and ASX Settlement treats the Message as a ~~Single~~

~~Entry~~Unilateral Batch Instruction which it schedules for settlement in accordance with Rule 10.9.11, such Client Trust Receivable Amount will be scheduled to be paid by the Settlement Participant to the Client Trust Account on the relevant Settlement Date in accordance with Rule 10.10A.

Introduced 25/05/15

6.3B.4 Transfer of Financial Products from Settlement Account to a Holding other than Accumulation Account

Subject to Rule 6.3B.7, a Settlement Participant may use a Valid ~~Single-Entry~~Unilateral Batch Message to Transfer Financial Products from its Settlement Account to a CHES Holding (other than its Accumulation Account) in connection with the purchase of Financial Products under a Cash Market Transaction which includes the Client Trust Deductible Amount (or part thereof) in respect of those Financial Products, in the manner set out in the Procedures.

If there are sufficient Available Financial Products in the Settlement Account (having regard to other Batch Instructions affecting the Settlement Account scheduled for settlement on or prior to the relevant Settlement Date) and ASX Settlement treats the Message as a ~~Single-Entry~~Unilateral Batch Instruction which it schedules for settlement in accordance with Rule 10.9.11, the Client Trust Deductible Amount specified in the Valid ~~Single-Entry~~Unilateral Batch Message will be scheduled to be receivable by the Settlement Participant from the Client Trust Account on the relevant Settlement Date in accordance with Rule 10.10A.

Subject to Rule 6.3B.4A, a Settlement Participant must not specify a Client Trust Deductible Amount in a Message under this Rule 6.3B.4 which exceeds the Client Trust Deductible Amount which applies in respect of the Transfer of those Financial Products at the time of transmitting that Message.

Note: Pursuant to the definition of Client Trust Deductible Amount in Rule 6.3B.8, in order for a Client Trust Deductible Amount to be included in a Message under this Rule 6.3B.4 this money must have been received and be held in the Client Trust Account at the time of Transmitting the Message. Rule 6.3B.4A provides an exception for cash contra transactions where the Client Trust Deductible Amount specified in a Message Transmitted under Rule 6.3B.4 relies on the future payment of monies into the Client Trust Account pursuant to a Message under Rule 6.3B.2 to move Financial Products from the Participant's Accumulation Account to its Settlement Account which is settling on the same day.

Introduced 25/05/15 Amended 18/04/16

6.3B.4A Client Trust Deductible Amount under Rule 6.3B.4 in respect of cash contra transactions

Where a Settlement Participant (or, if the Settlement Participant is acting as a Settlement Agent for a Clearing Participant for settling Cash Market Transactions, the Clearing Participant) is relying on the consideration from the sell side of a cash contra transaction in order to be able to withdraw money from the Client Trust Account in connection with the buy side of the cash contra transaction, and each of the following requirements are satisfied:

- (a) the sell side and the buy side of the cash contra transaction are:
 - (i) undertaken for the same client;
 - (ii) in respect of different Financial Products; and
 - (iii) to be settled on the same day;
- (b) the Settlement Participant has Transmitted a Valid ~~Single Entry~~Unilateral Batch Message under Rule 6.3B.2 in connection with the sell side of the cash contra transaction and the Message is treated by ASX Settlement as a ~~Single Entry~~Unilateral Batch Instruction which has been scheduled for settlement in accordance with Rule 10.9.11; and
- (c) the Settlement Participant seeks to Transmit a Valid ~~Single Entry~~Unilateral Batch Message under Rule 6.3B.4 in connection with the buy side of the cash contra transaction which specifies the date on which the ~~Single Entry~~Unilateral Batch Instruction referred to in paragraph (b) is scheduled for settlement as the scheduled Settlement Date in respect of the Transfer of Financial Products under the Batch Instruction arising from that Message,

then for the purposes of the Client Trust Deductible Amount which may be specified in the Message referred to in paragraph (c), the consideration from the sell side of the cash contra transaction included in the Client Trust Receivable Amount contained in the Message referred to in paragraph (b) is deemed to have been received by the Settlement Participant (or, if the Settlement Participant is acting as a Settlement Agent for a Clearing Participant for settling Cash Market Transactions, the Clearing Participant) and be held in the Client Trust Account at the time of Transmitting the Message referred to in paragraph (c), notwithstanding that Batch Settlement in respect of the Message referred to in paragraph (b) above has yet to occur.

Where the Message referred to in paragraph (b) is cancelled by the Settlement Participant pursuant to Rule 10.9.12 and the Settlement Participant had included in the Message referred to in paragraph (c) a Client Trust Deductible Amount which pursuant to this Rule 6.3B.4A relied on consideration from the sell side of the cash contra transaction, the Settlement Participant must cancel the Message referred to in paragraph (c) pursuant to Rule 10.9.12 prior to Batch Settlement on the scheduled Settlement Date for that Message.

Note: The ability to include in a Valid ~~Single Entry~~Unilateral Batch Message under Rule 6.3B.4 the Client Trust Deductible Amount (or part thereof) in connection with the buy side of the cash contra transaction pursuant to this Rule 6.3B.4A remains subject to the Settlement Participant (or if the Settlement Participant is acting as a Settlement Agent for a Clearing Participant for settling Cash Market Transactions, the Clearing Participant) also being entitled to withdraw that amount from the Client Trust Account under ASX Clear Operating Rule 4.24 in accordance with the ordinary operation of the definition of Client Trust Deductible Amount.

6.3B.5 Payment to Client Trust Account for Transfers from Accumulation Account to any Holding

Subject to Rule 6.3B.7, a Settlement Participant must ensure for any Financial Products held in its Accumulation Account, that where those Financial Products are Transferred to:

- (a) its Settlement Account in connection with the sale of those Financial Products under a Cash Market Transaction, that the Client Trust Receivable Amount in respect of those Financial Products under Rule 6.3B.2 is paid to the Client Trust Account concurrent with Batch Settlement on the day of the Transfer (and by no later than the completion of Batch Settlement on that day) in accordance with Rule 10.10A; or
- (b) a Holding (other than the Settlement Account) in connection with the sale of those Financial Products under a Cash Market Transaction, that the Client Trust Receivable Amount in respect of those Financial Products is paid to the Client Trust Account on the day of the Transfer.

For the purposes of Rule 6.3B.5(a), a Client Trust Receivable Amount included in a Message under Rule 6.3B.2 can be set-off against a Client Trust Deductible Amount included in a Message under Rule 6.3B.4 which is scheduled for settlement on the same day, in accordance with Rule 10.10A.

Introduced 25/05/15

6.3B.6 Payment to Client Trust Account for Transfers from CHESS Holding (other than Accumulation Account) to Settlement Account

Subject to Rule 6.3B.7, a Settlement Participant must ensure for any Financial Products held in a CHESS Holding (other than its Accumulation Account), that where those Financial Products are Transferred to its Settlement Account in connection with the sale of those Financial Products under a Cash Market Transaction, that the Client Trust Receivable Amount in respect of those Financial Products under Rule 6.3B.3 is paid to the Client Trust Account concurrent with Batch Settlement on the day of the Transfer (and by no later than the completion of Batch Settlement on that day) in accordance with Rule 10.10A.

For the purposes of this Rule 6.3B.6, a Client Trust Receivable Amount included in a Message under Rule 6.3B.3 can be set-off against a Client Trust Deductible Amount included in a Message under Rule 6.3B.4 which is scheduled for settlement on the same day, in accordance with Rule 10.10A.

Introduced 25/05/15

6.3B.7 Certain Transfers not subject to above requirements

Rules 6.3B.1 to 6.3B.6 do not apply to a Transfer of Financial Products effected:

- (a) by a Settlement Participant from one of its Accumulation Accounts to another of its Accumulation Accounts;

- (b) by a Settlement Participant from one of its Settlement Accounts to another of its Settlement Accounts; or
- (c) between two Participants as result of giving effect to a [Dual Entry Bilateral Demand Transfer](#) ~~or, a [Dual Entry Bilateral Batch Instruction](#) or a [Dual Entry Payment Batch Instruction](#)~~.

Introduced 25/05/15

6.3B.8 Client Trust Receivable Amount and Client Trust Deductible Amount

For the purposes of these Rules, the 'Client Trust Receivable Amount' in respect of Financial Products is the consideration for the sale of those Financial Products under the relevant Cash Market Transaction other than to the extent that:

- (a) the relevant Financial Products were not Financial Products of a client (or from a person acting on behalf of a client) or for the benefit of a client;
- (b) the Client Trust Receivable Amount has already been paid to the Client Trust Account; or
- (c) the Settlement Participant, or, if the Settlement Participant is acting as a Settlement Agent for a Clearing Participant for settling Cash Market Transactions, the Clearing Participant, is entitled to deduct from the consideration remuneration payable to it in connection with the sale of the Financial Products under that Cash Market Transaction and the Settlement Participant or the Clearing Participant (as applicable) deducts such amount.

For the purposes of these Rules, subject to Rule 6.3B.4A the 'Client Trust Deductible Amount' in respect of Financial Products is the money received by the Settlement Participant, or, if the Settlement Participant is acting as a Settlement Agent for a Clearing Participant for settling Cash Market Transactions, the Clearing Participant, in connection with the purchase of the Financial Products under the relevant Cash Market Transaction held in the Client Trust Account which the Settlement Participant or the Clearing Participant (as applicable) is entitled to withdraw from the Client Trust Account under ASX Clear Operating Rule 4.24.

8.5 EFFECTS OF SUSPENSION AND REVOCATION OF APPROVAL

8.5.1 Action taken by ASX Settlement upon suspension

Subject to Rule 8.5.2, if ASX Settlement suspends approval of a class of an Issuer's Financial Products, ASX Settlement must:

- (a) if an Instruction or Message would affect a CHESS Holding of Financial Products in that class:
 - (i) suspend all such Instructions it has already received; and
 - (ii) reject all such Instructions or Messages that are subsequently received;
- (aa) give notice of the suspension or rejection of such Instructions or Messages to:
 - (i) the Issuer;
 - (ii) the relevant Approved Market Operator; and
 - (iii) to the extent ASX Settlement considers reasonably necessary, other Facility Users;
- (ab) remove any Settlement Lock or Demand Lock applied in relation to the suspended Financial Products;
- (b) on each Business Day that the class of Financial Products remains suspended, reschedule any suspended Instructions for settlement on the next Business Day; and
- (c) subject to Rule 8.5.2, cancel any Instruction that remains suspended on the 15th ~~10th~~ Business Day after suspension of approval. For the purposes of this Rule 8.5.1(c), ASX Settlement may, in its absolute discretion, cancel any Instruction that remains suspended on or after the 10th Business Day after the relevant suspension of approval.

8.7.3 Holder Record for Holding of FOR Financial Products

A Participant must determine whether the Residency Indicator of a Holder Record is applicable to any new Holding of FOR Financial Products, and if it is not applicable to the new Holding of FOR Financial Products and there is no existing Holder Record with the appropriate Residency Indicator, the Participant must:

- (a) establish a separate Holder Record for that new Holding with the appropriate Residency Indicator; and
- (b) transfer that Holding to that Holder Record.

Note: Because of differing definitions of “Foreign Person” under the governing legislation or constitution of different Issuers with aggregate foreign ownership restrictions, a Holder’s status (for the purposes of settling transactions in FOR Financial Products) may differ between Issuers.

Where these circumstances apply, Holders must have two distinct Holder Records in CHESS; one with a Residency Indicator of “F” and another with a Residency Indicator of “D”. Holdings of particular Financial Products must then be linked to the appropriate Holder Record.

9.5A.1 Message to initiate a Bilateral Demand Settlement Transfer

A Participant may initiate a Bilateral Demand Settlement Transfer of Financial Products by Transmitting to ASX Settlement a Valid Bilateral Demand Settlement Message in accordance with the Procedures.

Note: A Valid Bilateral Demand Settlement Message that is Matched by ASX Settlement will be a proper ASTC transfer.

9.5A.2 Financial Products must not be Transferred or Converted

If a Participant who controls a Source Holding

(a) Transmits a Valid Bilateral Demand Settlement Message in accordance with Rule 9.5A.1; and

(b) there are sufficient Available Financial Products or Entitlements.

ASX Settlement will apply a Demand Lock and the relevant Financial Products (including any Entitlements) will be prevented from being deducted from the relevant Holding, except where:

(c) the relevant Financial Products are Transferred pursuant to settlement of the resulting Bilateral Demand Settlement Instruction;

(d) the relevant Bilateral Demand Settlement Message has been rejected in accordance with Rule 9.5A.3; or

(e) the relevant Bilateral Demand Settlement Message has been cancelled in accordance with Rule 9.5A.7 or 9.5A.8.

9.5A.3 Bilateral Demand Settlement Messages - Rejection

If a Valid Bilateral Demand Settlement Message is received by ASX Settlement from the Participant that controls the Source Holding and either:

(a) the Source Holding; or

(b) during an Ex Period, a Cum Entitlement Balance for the Source Holding,

specified in the Bilateral Demand Settlement Message does not hold sufficient Available Financial Products or Entitlements to meet the delivering Participant's obligation for the Source Holding, ASX Settlement must:

(c) reject the Bilateral Demand Settlement Message; and

(d) notify the delivering Participant.

9.5A.4 Matching Bilateral Demand Settlement Messages

If:

- (a) a Participant Transmits a Valid Bilateral Demand Settlement Message in accordance with the Procedures; and
- (b) the Valid Message Transmitted by the other Participant:
 - (i) subject to paragraph (iv), specifies the same details;
 - (ii) specifies or implies the same designation as Cum Entitlement or Ex Entitlement;
 - (iii) if specified in the Message, the Participants have specified the same Matching Reference; and
 - (iv) either:
 - (A) specifies the same Settlement Amount or a Settlement Amount that differs by no more than the Settlement Amount Tolerance;
 - (B) if only one Participant has specified an Override Tolerance Amount, the other Participant has specified the same Settlement Amount or a Settlement Amount that differs by no more than the Override Tolerance Amount; or
 - (C) if both Participants have specified an Override Tolerance Amount, the Settlement Amount specified by both Participants is the same or differs by no more than the higher of the Override Tolerance Amounts specified by the Participants.

then, subject to paragraph (c), ASX Settlement must Match the Messages.

- (c) Where there are multiple available Matches for a Bilateral Demand Settlement Message, ASX will Match:
 - (i) for multiple available Matches with the same Settlement Amount as the Bilateral Demand Settlement Message, the Bilateral Demand Settlement Message which was received earliest by CHES; and
 - (ii) for multiple available Matches which differ in Settlement Amount from the Bilateral Demand Settlement Message:
 - (A) the Bilateral Demand Settlement Message which has the closest Settlement Amount to the Bilateral Demand Settlement Message; or
 - (B) if there are multiple available Matches at the closest Settlement Amount to the Bilateral Demand Settlement

Message, the Bilateral Demand Settlement Message which was received earliest by CHES.

9.5A.5 Bilateral Demand Settlement Transfers in respect of Confirmed FOR Financial Products

If ASX Settlement matches a Valid Bilateral Demand Settlement Message under Rule 9.5A.4 which initiates a Foreign to Foreign Allocation; and

those Financial Products will have the status of Confirmed FOR Financial Products.

9.5A.6 Action by ASX Settlement following Matching of Bilateral Demand Settlement Messages

If a Valid Bilateral Demand Settlement Message is Matched by ASX Settlement with another Valid Bilateral Demand Settlement Message Transmitted by the counterparty Participant then:

- (a) ASX Settlement will treat the Matched Messages as a Bilateral Demand Settlement Instruction;
- (b) for the purposes of determining the Settlement Amount in a Bilateral Demand Settlement Instruction, ASX Settlement will:
 - (i) if the amount to be included as the Settlement Amount specified by each Participant differs by no more than the Settlement Amount Tolerance, apply the lower of the two amounts as the Settlement Amount for the Bilateral Demand Settlement Instruction scheduled for settlement;
 - (ii) if only one Participant has specified an Override Tolerance Amount and the amount to be included as the Settlement Amount specified by each Participant differs by no more than the Override Tolerance Amount, apply the Settlement Amount specified by the Participant which did not submit an Override Tolerance Amount as the Settlement Amount for the Bilateral Demand Settlement Instruction scheduled for settlement;
 - (iii) if both Participants specify different Override Tolerance Amounts and the amount to be included as the Settlement Amount specified by each differs by no more than the higher of the Override Tolerance Amounts specified by the Participants, apply the Settlement Amount submitted by the Participant with the lowest Override Tolerance Amount as the Settlement Amount for the Bilateral Demand Settlement Instruction scheduled for settlement; or
 - (iv) if both Participants specify the same Override Tolerance Amount and the amount to be included as the Settlement Amount by each

Participant differs by no more than the Override Tolerance Amount specified by the Participants, apply the lower of the two Settlement Amounts submitted by the Participants as the Settlement Amount for the Bilateral Demand Settlement Instruction scheduled for settlement; and

- (c) ASX Settlement will notify each Participant that the Bilateral Demand Settlement Instruction has been scheduled for demand settlement.

9.5A.7 Participant may cancel Bilateral Demand Settlement Message

A Participant may cancel a Valid Bilateral Demand Settlement Message that has not been Matched by ASX Settlement, by Transmitting to ASX Settlement a Valid Message requesting cancellation before ASX Settlement Matches the original Message under Rule 9.5A.4.

9.5A.8 Action by ASX Settlement if Messages are not Matched

If a Bilateral Demand Settlement Message has not been Matched within the Scheduled Time, ASX Settlement must:

- (a) cancel the Bilateral Demand Settlement Message; and
(b) within the Scheduled Time, notify:
(i) the Participant that Transmitted the Message; and
(ii) the counterparty Participant,
that the Bilateral Demand Settlement Message has been cancelled.

9.5A.9 Removal of Demand Lock

If:

- (a) the relevant Bilateral Demand Settlement Message has been rejected in accordance with Rule 9.5A.3; or
(b) the relevant Bilateral Demand Settlement Message has been cancelled in accordance with Rule 9.5A.7 or 9.5A.8,

then ASX Settlement will remove the Demand Lock that was applied in connection with the relevant Bilateral Demand Settlement Message.

SECTION 10 BATCH SETTLEMENT

A Settlement Participant may settle Instructions in the Settlement Facility in Batch Settlement or Real Time Gross Settlement. Batch Settlement is governed by Section 10 of these Rules. Real Time Gross Settlement is governed by Section 11.

Batch Settlement involves the settlement of Batch Instructions. Batch Instructions may be:

- (a) for value. This is known as DvP Batch Settlement. Batch Instructions that can be settled in DvP Batch Settlement are:
 - (i) CCP Batch Instructions. These consist of CCP Net Batch Instructions and CCP Gross Batch Instructions;
 - (ii) Direct Batch Instructions; and
 - (iii) ~~Dual Entry~~[Bilateral](#) Batch Instructions;
- (b) free of value. Batch Instructions that can be settled in Batch Settlement free of value are either:
 - (i) ~~Dual Entry~~[Bilateral](#) Batch Instructions; or
 - (ii) ~~Single Entry~~[Unilateral](#) Batch Instructions; and
- (c) for payment free of delivery. Batch Instructions that can be settled in Batch Settlement for payment free of delivery are known as Payment Batch Instructions which consist of CCP Derivatives Payment Batch Instructions, ~~Dual Entry Payment Batch Instructions~~ and AQUA Payment Batch Instructions.

In addition to determining the eligibility of Batch Instructions to be included in DvP Batch Settlement and Batch Settlement, the purpose of this Section is to set out Rules relating to the operation of Batch Settlement in the Settlement Facility including:

- (a) the basis on which Settlement Participants can act in respect of Batch Settlement;
- (b) payment arrangements for Batch Settlement;
- (c) removal, cancellation and change of Batch Instructions;

(c) [linking Batch Instructions for the purpose of Batch Settlement;](#)

- (d) discharge of settlement obligations;
- (e) failing Batch Instructions;
- (ea) notification to the Approved Clearing Facility of failed CCP Batch Instructions which become subject to settlement through Offsetting Transaction Arrangements;
- (f) suspension or cancellation of settlement; and
- (g) settlement subject to entitlements and adjustments.

This section also deals with Client Trust Account settlement obligations that need to be discharged.

10.4 BATCH INSTRUCTIONS INCLUDED IN BATCH SETTLEMENT

10.4.1 Classes of Batch Instructions included in Batch Settlement

Unless ASX Settlement determines otherwise, a Batch Instruction is eligible for Batch Settlement under this Section 10 if the Batch Instruction is:

- (a) a CCP Batch Instruction;
- (b) a Direct Batch Instruction;
- (c) a ~~Dual Entry~~[Bilateral](#) Batch Instruction;
- (d) a ~~Single Entry~~[Unilateral](#) Batch Instruction;
- (e) a Payments Batch Instruction; or
- (f) any other class of Batch Instruction ASX Settlement may determine from time to time. In determining whether a class of Batch Instruction is eligible for DvP Batch Settlement, ASX Settlement must have regard to the following factors:
 - (i) where it is necessary that any person communicates reliably with CHES; that person meets any technical and/or performance requirements;
 - (ii) the inclusion of the additional class of Batch Instruction in DvP Batch Settlement will:
 - A. permit Batch Instructions the subject of National Guarantee Fund protection regime to be distinguished, and if necessary,

segregated from, Batch Instructions in DvP Batch Settlement which are not the subject of NGF coverage; and

- B. not adversely affect the NGF coverage;
- (iii) Participants who will be parties to the additional Batch Instructions admitted to DvP Batch Settlement, and investors upon whose behalf they act, will be informed that the additional class of Batch Instruction is not covered by the National Guarantee Fund;
- (iv) DvP Batch Settlement of the class of Batch Instruction is likely to be commercially viable for ASX Settlement and will not adversely affect the integrity, reliability or efficiency of the Settlement Facility; and
- (v) where the Commission requires that the class of transactions to be admitted to Batch Settlement be covered by an investor protection regime, and NGF coverage is not applicable to the class of Batch Instruction, there is an applicable investor protection regime which is acceptable to the Commission.

A person may apply to ASX Settlement in the form prescribed by ASX Settlement to have a class of Batch Instruction included in DvP Batch Settlement.

A Batch Instruction in which the obligation is to deliver or receive Financial Products for value will be settled in DvP Batch Settlement.

ASX Settlement may in its absolute discretion determine the priority in which Batch Instructions in DvP Batch Settlement will be Failed if one or more instructions scheduled for settlement on a Business Day would give rise to a Financial Products Shortfall or a Payment Shortfall (or to limit a Settlement Participant's net obligation to make payment in respect of that Payment Facility to the amount notified under Rule 10.10.4(a)).

Introduced 11/03/04 Amended 28/04/14

10.4.7 Removing Batch Instructions from Batch Settlement

ASX Settlement may immediately remove a class of Batch Instruction from either Batch Settlement or DvP Batch Settlement if ASX Settlement forms the reasonable opinion that:

- (a) the integrity, reliability or efficiency of the Settlement Facility will be significantly impaired by allowing the class of Batch Instruction to continue to be included in Batch Settlement or DvP Batch Settlement; or
- (b) it is necessary for the protection of Participants from risk of loss.

Where ASX Settlement removes a class of Batch Instruction from DvP Batch Settlement, ASX Settlement may where it considers it appropriate, allow that class of Batch Instruction to be settled in Batch Settlement.

 - (iii) if the Secondary Matching Flag is indicated as applying ~~specified~~ in the Message, the Participants have specified the same Matching Reference; and
 - (iv) either:
 - (A) specifies the same Settlement Amount or a Settlement Amount that differs by no more than the Settlement Amount Tolerance; or

(B) if only one Participant has specified an Override Tolerance Amount, the other Participant has specified the same Settlement Amount or a Settlement Amount that differs by no more than the Override Tolerance Amount; or

~~(A)~~(C) if both Participants have specified an Override Tolerance Amount, the Settlement Amount specified by both Participants is the same or differs by no more than the higher of the Override Tolerance Amounts specified by the Participants,

ASX Settlement will, subject to paragraph (ba), Match the Messages; and

(ba) where there are multiple available Matches for a Bilateral Batch Message, ASX will Match:

(i) for multiple available Matches with the same Settlement Amount as the Bilateral Batch Message, the Bilateral Batch Message which was received earliest by CHES;

(ii) for multiple available Matches which differ in Settlement Amount from the Bilateral Batch Message:

(A) the Bilateral Batch Message which has the closest Settlement Amount to the Bilateral Batch Message; or

(B) if there are multiple available Matches at the closest Settlement Amount to the Bilateral Batch Message, the Bilateral Batch Message which was received earliest by CHES.

(c) if the Messages are Matched within the Scheduled Time, ASX Settlement will:

(i) treat the Matched Messages as a ~~Dual Entry~~Bilateral Batch Instruction ~~or a Dual Entry Payment Batch Instruction as the case may be;~~

(ii) schedule the ~~Dual Entry~~Bilateral Batch Instruction ~~or the Dual Entry Payment Batch Instruction, as the case may be,~~ for settlement on the Settlement Date specified in the instruction;

(iii) notify each Participant that the ~~Dual Entry~~Bilateral Batch Instruction ~~or Dual Entry Payment Batch Instruction~~ has been scheduled for settlement; and

(iv) for the purposes of determining the Settlement Amount in a Bilateral Batch Instruction, ASX Settlement will:

(A) if the amount to be included as the Settlement Amount specified by each Participant differs by no more than the Settlement Amount Tolerance, apply the lower of the two amounts as the Settlement Amount for the ~~Dual Entry~~Bilateral Batch Instruction ~~or the Dual Entry Payment Batch Instruction~~ that is scheduled for settlement; ~~or~~

- (B) if only one Participant has specified an Override Tolerance Amount and the amount to be included as the Settlement Amount specified by each Participant differs by no more than the Override Tolerance Amount, apply the Settlement Amount specified by the Participant which did not submit an Override Tolerance Amount as the Settlement Amount for the Bilateral Batch Instruction scheduled for settlement;
- (C) if both Participants specify different Override Tolerance Amounts and the amount to be included as the Settlement Amount specified by each differs by no more than the higher of the Override Tolerance Amounts specified by the Participants, apply the Settlement Amount submitted by the Participant with the lowest Override Tolerance Amount as the Settlement Amount for the Bilateral Batch Instruction scheduled for settlement; or

SECTION 12 REGISTRATION, NOVATION, NETTING AND SETTLEMENT

12.1 REGISTRATION AND NOTIFICATION OF MARKET TRANSACTIONS

12.1.1 Market Transactions to be registered

Subject to Rule 12.2.5, ASX Clear will register a Market Transaction (other than an OTC Options Market Transaction) if, and only if:

- (a) there is a current agreement between ASX Clear, an Approved Settlement Facility and the Approved Market Operator through which the Market Transaction was effected, for the provision of a Trade Acceptance Service;
- (b) the Approved Market Operator has submitted the Market Transaction to ASX Clear in accordance with the Terms of Trade Acceptance Service; and
- (c) the Market Transaction is in a category of Market Transactions which ASX Clear will accept for registration, as specified by ASX Clear in the Procedures.

12.1.2 Market Transactions notified but not registered

ASX Clear will notify an Approved Settlement Facility of a Cash Market Transaction which is not registrable under Rule 12.1.1 if:

- (a) there is a current agreement between ASX Clear, the Approved Settlement Facility and the Approved Market Operator through which the Cash Market Transaction was effected, under which ASX Clear agrees to notify that category

of Cash Market Transaction to the Approved Settlement Facility for settlement by that facility;

- (b) the Approved Market Operator notifies ASX Clear of that Cash Market Transaction in accordance with the terms of that agreement; and
- (c) the Cash Market Transaction is in a category of Cash Market Transactions which ASX Clear will notify to an Approved Settlement Facility, as specified by ASX Clear in the Procedures.

12.2 NOVATION

12.2.1 ASX Clear to novate Cash Market Transactions and Derivatives Market Contracts

ASX Clear will novate a Cash Market Transaction which is registered in accordance with Rule 12.1.1 if and only if the delivering PID and the receiving PID ~~specified in the particulars of~~ for the Cash Market Transaction submitted to ASX Clear by the Approved Market Operator relate to two different legal entities.

If the delivering PID and the receiving PID relate to the same legal entity, ASX Clear will, unless instructed otherwise in accordance with the Procedures, register the Cash Market Transaction and notify the relevant Participant that the Cash Market Transaction has been registered for information only.

ASX Clear will novate a Cash Market Transaction subject to and in accordance with this Rule 12.2.1 with effect from:

- (a) if the Cash Market Transaction is the result of the matching of bids and offers on the market of the Approved Market Operator, immediately after the matching of those bids and offers; or
- (b) if the Cash Market Transaction is the result of a transaction being recorded by the Approved Market Operator, immediately after the transaction is recorded.

ASX Clear will novate a Derivatives Market Contract, if the Derivatives Market Transaction to which it relates has been registered under Rules 12.1.1 or 12.1.1A, at the time of registration.

Note: A Cash Market Transaction which is submitted by an Approved Market Operator to ASX Clear for registration must be validated by ASX Clear in accordance with the Terms of Trade Acceptance Service in order to confirm that the Cash Market Transaction is registrable under Rule 12.1.1. If the Cash Market Transaction is determined by ASX Clear to be registrable and if it meets the requirements for

novation in this Rule 12.2.1, then it is novated with effect from the point in time specified by Rule 12.2.1.

For the avoidance of doubt, Derivatives Market Contract includes an Options Market Contract executed on the over the counter market and a Derivatives Market Transaction includes an OTC Options Market Transaction.

12.2.2 Effect of novation

Upon novation of a Cash Market Transaction or a Derivatives Market Contract under Rule 12.2.1:

- (a) the Cash Market Transaction is discharged and replaced with two Cash CCP Transactions; and
- (b) the Derivatives Market Contract is discharged and replaced with two Derivatives CCP Contracts,

with the following effect, subject to these Rules:

- (c) the obligations owed by a Seller to a Buyer are replaced by obligations in the same terms owed by the Seller to ASX Clear, and by obligations owed by ASX Clear to the Buyer;
- (d) the obligations owed by a Buyer to a Seller are replaced by obligations in the same terms owed by the Buyer to ASX Clear, and by obligations owed by ASX Clear to the Seller.

ASX Clear and each Participant acknowledge that:

- (e) Cash CCP Transactions (excluding Cash CCP Transactions which are removed from novation pursuant to Rule 12.7.1 or 12.7.2 and not reinstated pursuant to Rule 12.7.5); and
- (f) Derivatives CCP Contracts,

are market netting contracts (as defined in the Payment Systems and Netting Act 1998) the terms of which incorporate any and all Rules which provide for or relate to the exercise of default rights, the netting, set-off or termination of obligations, the calculation or payment of termination values or net amounts and obligations to pay deposits or margin calls, or which otherwise affect the rights and obligations of the parties to the contracts, including, without limitation the Recovery Rules and:

12.6 CALCULATION OF NET CLEARING OBLIGATIONS

12.6.1 Calculation, set-off and notification of net payment obligation

Subject to Rule 12.6.2A and Rule 12.7 upon novation of a Cash Market Transaction due for settlement on a particular Business Day, the payment and delivery obligations under the Cash CCP Transaction are immediately set off against all other payment and delivery obligations due for settlement on that Business Day in accordance with the rules of law as follows:

- (a) the total of all the amounts that a Participant is obliged to pay ASX Clear on that Business Day for a PID will be set off against the total of all the amounts that the Participant is entitled to receive from ASX Clear on that Business Day for the same PID; and
- (b) the total number of Financial Products of a particular class to be delivered to a Participant by ASX Clear on that Business Day for a PID will be set off against the total number of Financial Products of that class to be delivered to ASX Clear on that Business Day for the same PID.

Note: For the purpose of determining net delivery or payment obligations and entitlements in respect of a class of Financial Products due to be delivered or received on a Business Day during an Ex-Period (as defined in the ASX Settlement Operating Rules), regard is to be had to whether the Financial Product is to be transferred with or without the relevant Entitlement.

12.7.7 Request by Buyer or Seller where counterparty not known

Where a Buyer or Seller (as the case may be) is not aware of the identity of its counterparty for the purpose of making a request to ASX Clear for the removal of a transaction under ~~either Rule 12.7.2 or Rule 12.7.3~~, the Buyer or Seller may ask ASX Clear, by the time and in the manner set out in the Procedures, to facilitate such a request.

Introduced 28/11/05

12.7.8 ASX Clear action where asked to facilitate a request

Upon being asked under Rule 12.7.7 to facilitate a request, ASX Clear will use reasonable endeavours to contact the counterparty to ascertain whether the counterparty is agreeable or otherwise to a request to remove the transaction. ASX Clear will notify the Buyer or Seller as soon as reasonably practicable whether the counterparty is agreeable to the request.

Introduced 28/11/05

12.7.9 Obligations under second leg of Offsetting Transaction Arrangement relating to Failed CCP Gross Batch Instruction

Where the Approved Settlement Facility notifies ASX Clear of Failed CCP Gross Batch Instructions under Rule 12.8A and pursuant to that Rule ASX Clear enters into an Offsetting Transaction Arrangement with the Participant that has obligations or entitlements under the Failed CCP Gross Batch Instruction, then:

- (a) obligations and entitlements under the first leg of an Offsetting Transaction Arrangement entered into in respect of each such Failed CCP Gross Batch Instruction will be set-off against and discharged by equal but opposite obligations and entitlements under the Failed CCP Gross Batch Instruction in the manner set out in Rule 12.8A;
- (b) CCP Gross Batch Instructions due for settlement on a Business Day in respect of that Participant will, in addition to the CCP Gross Batch Instructions notified under Rule 12.7.4, also include separate CCP Gross Batch Instructions containing details of delivery and payment obligations and entitlements (as applicable) of the Participant under the second leg of each Offsetting Transaction Arrangement entered into in respect of a CCP Gross Batch Instruction (and representing equivalent delivery and payment obligations and entitlements of the Participant (as applicable) as under the CCP Gross Batch Instruction) Failed on the previous Business Day relating to that PID; and

- (c) an instruction will be deemed to have been generated by ASX Clear and sent to the Approved Settlement Facility which contains the details referred to in (b) above.

3. FINANCIAL PRODUCTS MOVEMENTS

3.1 Prerequisites to lodgement of Approved Financial Products

Client Accounts

Client Accounts may qualify to participate in the paperless lodgement scheme where:-

- (a) the Account name in DCS matches the Registered Holder name in CHES, the ASX Clear Participant is the ASX Settlement Participant that controls the Registered Holding and a completed original *Addendum to Derivatives Client Agreement Form* has been lodged with ASX Clear prior to 28 February 2005; or
- (b) a completed *Registered Holder Collateral Cover Authorisation* form has been lodged for the Client Accounts with ASX Clear prior to 1 March 2019; or
- (c) a Participant has lodged with ASX Clear a document in a form approved by ASX Clear, that identifies a Holder Identification Number (HIN) on the CHES Subregister against that Client Account ("**Linking Information**").

Client Accounts for which these requirements have not been completed must lodge other forms of Cover, i.e. cash or bank guarantees.

With effect from 1 November 2011, where a Participant lodges a copy of the *Registered Holder Collateral Cover Authorisation* form, it must retain the original of the form and be able to produce it for ASX Clear on request for a period of 7 years from the date on which the Participant ceases to be the relevant client's Controlling Participant.

House Accounts

Prior to lodging Approved Financial Products on a House Account a completed *House Account HIN* form must be lodged with ASX Clear.

The *House Account HIN* form is included at Annexure 2.

House Accounts for which these requirements have not been completed must lodge other forms of Cover, i.e. cash or bank guarantees.

Cash Market Accounts

Prior to lodging Approved Financial Products on a Cash Market Account a completed *Cash Market Account HIN* form must be lodged with ASX Clear.

The *Cash Market Account HIN* form is included at Annexure 2.

Cash Market Accounts for which these requirements have not been completed must lodge cash as Cover.

3.2 Lodgement of Approved Financial Products

ASX Clear will only accept lodgements over financial products which are CHESSE sponsored and that meet the Collateral eligibility criteria.

a. Lodgement of Approved Financial Products to Cover Derivative Margin Obligations

Participants can arrange for an ASX Settlement participant to lodge Collateral electronically by sending a [message requesting the lodgement of Collateral in accordance with the User Technical Documentation](#). ~~CHESSE 027 – Options Cover Creation Request message to CHESSE.~~ CHESSE then forwards this message to ASX Clear [in accordance with the User Technical Documentation](#) ~~as a 610 – Options Cover Notification CHESSE message.~~

~~If ASX Clear rejects the lodgement, the CHESSE participant will receive from CHESSE an 030 – Reduced Options Cover CHESSE message. If ASX Clear accepts the lodgement, both the ASX Settlement participant and the Participant who has the Derivative margin obligation (where such Participant is different to the ASX Settlement participant) will receive notification from CHESSE of the acceptance by ASX Clear of the lodgement of Collateral in accordance with the User Technical Documentation.~~

[If ASX Clear rejects the lodgement, the ASX Settlement participant will receive notification from CHESSE of the rejection in accordance with the User Technical Documentation.](#)

Once it has been processed by ASX Clear, the Participant will be sent confirmation via DCS.

b. Lodgement of Approved Financial Products to Cover Cash Market Margin Obligations

Participants can arrange for an ASX Settlement participant to lodge Collateral electronically by sending a [message requesting the lodgement of Collateral in accordance with the User Technical Documentation](#) ~~an 871 – Margin Cover Creation request CHESSE message.~~ CHESSE then forwards this message to ASX Clear [in accordance with the User Technical Documentation](#).

~~Once the request has been processed, the Participant will receive an 876 – Accepted Margin Cover Creation CHESSE message. If ASX Clear accepts the lodgement, the ASX Settlement participant will receive notification from CHESSE of the acceptance by ASX Clear of the lodgement of Collateral in accordance with the User Technical Documentation.~~

[If ASX Clear rejects the lodgement, the ASX Settlement participant will receive notification from CHESSE of the rejection in accordance with the User Technical Documentation.](#) ~~If the request is rejected, the Participant will receive an 878 – Reduced Margin Cover CHESSE message.~~

Introduced 11/03/04 Amended 20/05/05, 02/02/09, 07/06/13

3.3 Lodgement of Approved Financial Products as Specific Cover

Specific Cover lodgements may be established at the Financial Product level within an Account or at the Account level as follows:

a. Financial Product Level

A Participant may classify any Financial Product level within an Account as specific Cover.

ASX Clear will only accept lodgements of Financial Products which are CHES sponsored. Participants can arrange for an ASX Settlement participant to lodge Collateral electronically by sending a [message in accordance with the User Technical Documentation which specifies the specific Cover to be lodged](#)~~CHES 027 - Options Cover Creation Request message to CHES specifying specific Cover lodgement~~. CHES then forwards this message to ASX Clear [in accordance with the User Technical Documentation](#)~~as a 610 - Options Cover Notification CHES message~~.

~~If ASX Clear rejects the lodgement, the ASX Settlement Participant will receive from CHES an 030 - Reduced Options Cover CHES message. If ASX Clear accepts the lodgement, both the ASX Settlement participant and the Participant who has the margin obligation (where such Participant is different to the ASX Settlement participant) will receive notification from CHES of the acceptance by ASX Clear of the lodgement of Collateral as specific Cover in accordance with the User Technical Documentation.~~

~~If ASX Clear rejects the lodgement, the ASX Settlement participant will receive notification from CHES of the rejection in accordance with the User Technical Documentation.~~

Once it has been processed by ASX Clear, the Participant will be sent confirmation via DCS.

b. Account Level

A Participant may classify any Account as specific Cover.

When an Account has been classified as specific Cover, any future Financial Product lodgements in the Account will be automatically classified as specific Cover and will only be applied against written Call Option positions with the same underlying [Financial Products](#) lodged in the Account (see 2.2.1(ii)).

However, if a Participant requires existing Financial Product lodgements in a specific Cover Account to be classified as specific Cover, the Participant must submit a request to ASX Clear via email to clearing@asx.com.au ~~deriv.clearing@asx.com.au~~.

Introduced 02/02/09 Amended 07/06/13

3.4 Withdrawal of Approved Financial Products or Cash Lodged as Cover Against Margin Obligations

In the event that a Participant wishes to exchange Collateral or replace one form of Cover (Collateral or Cash Cover) with another form of Cover in respect of margin obligations, the replacement Cover must be received by ASX Clear before ASX Clear will

release the Cover to be exchanged or replaced (as the case may be). Three alternative approaches are outlined below.

a. 'Exchanging' Collateral

Collateral may be replaced by other Collateral at any time between 8.00 am and 5.00 pm on any Business Day. Where a Participant wishes to replace Collateral with other Collateral, ASX Clear will release the Collateral that is to be replaced upon receipt of the replacement Collateral.

b. Replacement of Collateral with Cash Cover

Where a Participant wishes to replace Collateral with Cash Cover, ASX Clear will release the Collateral that is to be replaced upon receipt of the replacement Cash Cover. There is no mechanism available to effect the replacement of Collateral with Cash Cover intra-business day. Participants are required to transmit withdrawal requests by 5.00 pm on the business day before release of the Collateral is required. ASX Clear will remove the Collateral from the account(s) and release it back to the Participant after the scheduled (CHES or Austraclear) settlement *has completed* on the required day of release.

c. Replacement of Cash Cover with Collateral

Where a Participant wishes to replace Cash Cover with Collateral, ASX Clear will release the Cash Cover that is to be replaced following receipt of the replacement Collateral. [There is no mechanism available to effect the replacement of Cash Cover with Collateral Cover intra-business day.](#) Participants will be required to lodge the replacement Collateral with ASX Clear by 5.00 pm on the business day before the Cash Cover is required to be released. ASX Clear will undertake the resulting payment to the Clearing Participant on the following day in the normal daily scheduled CHES/ Austraclear settlement.

It is important that Participants ensure these timings are taken into account in planning all movements of Cover and that the monitoring tools available in collateral management are utilised.

~~In all cases,~~ Participants are required to contact Clearing [Product Operations](#) and [Settlements](#) (phone 1800 ~~814 240 051033~~, email clearing@asx.com.au ~~deriv.clearing@asx.com.au~~) to request the [exchange of Collateral referred to in Paragraph 3.4a above](#) ~~replacement of Cover~~.

Amended 16/07/07, 02/02/09, 07/06/13

3.5 Withdrawal of Approved Financial Products Not Covering Margin Obligations

ASX Clear will attempt to process Collateral withdrawals by the following times:

for withdrawal requests received by ASX Clear by 9.00 am (Sydney time) - by 10.00 am on that day.

for withdrawal requests received by ASX Clear by 5.00 pm (Sydney time) - on the same day.

for withdrawal requests received by ASX Clear after 5.00 pm (Sydney time) - by 10.00 am the next Business Day.

The time of receipt of a withdrawal request is the time when the CHES message is received by ASX Clear.

Amended 02/02/09

3.6 Withdrawal of CHES Holdings

Total Withdrawal

The Participant must arrange for the relevant ASX Settlement participant to transmit a [message requesting the withdrawal of Derivatives Collateral in accordance with the User Technical Documentation](#) ~~CHES 029 - Options Cover Removal Request message. ASX Clear will receive a message from CHES notifying it of the request for withdrawal of Derivatives Collateral in accordance with the User Technical Documentation. which is received by ASX Clear from CHES as a 612 - Notification of Removal of Options Cover CHES message.~~

For the withdrawal of Collateral covering a margin obligation in respect of a Cash Market Account, the [ASX Settlement Participant](#) must send [a message requesting the withdrawal of Collateral in accordance with the User Technical Documentation.](#) ~~an 877 - Margin Cover Removal Request CHES message. ASX Clear will receive a message from CHES notifying it of the request for withdrawal of Collateral in respect of a Cash Market Account in accordance with the User Technical Documentation.~~

Partial withdrawals

For partial withdrawals, the ~~029/612 CHES~~ message must identify the number of financial products to be withdrawn.

For partial withdrawals of Collateral covering a margin obligation in respect of a Cash Market Account, the [ASX Settlement Participant](#) must send ~~a an 877 CHES~~ message identifying the number of financial products to be withdrawn [in accordance with the User Technical Documentation.](#)

Rejection of Withdrawal

Incomplete or incorrect [Derivatives Collateral Options Cover Removal Requests](#) will be rejected. ASX Clear will send a [rejection message](#) ~~CHES 605 - Options Cover Removal Rejection message~~ to CHES and CHES will send [a rejection message](#) ~~an 078 - Rejected Options Cover Removal CHES message~~ to the [ASX Settlement CHES](#) participant [in accordance with the User Technical Documentation.](#)

Incomplete or incorrect Cash Market Margin Cover ~~r~~Removal ~~r~~Requests will be rejected. ASX Clear will send a [rejection message to CHES and CHES will send a rejection message to the ASX Settlement participant in accordance with the User Technical Documentation](#) ~~956 - Rejected Margin Cover Removal Request CHES message.~~

Third Party Withdrawals

For withdrawals where the ASX Settlement ~~p~~Participant is different to the ASX Clear Participant, the ASX Clear Participant will receive a [message in accordance with the User Technical Documentation](#) ~~CHES 168 - CP Collateral Removal Authorisation Request message following a message sent to request the withdrawal of Derivatives Collateral in response to the CHES 029 message.~~ The ASX Clear Participant must then respond with

[an authorisation or rejection message in accordance with the User Technical Documentation](#)~~—CHES 103—CP Collateral Removal Authorisation message~~, which will trigger ~~the~~ either the withdrawal message to ASX Clear or the withdrawal rejection message to the ASX Settlement participant in accordance with the [User Technical Documentation](#)~~CHES 612 message to ASX Clear, or a CHES 109—CP Collateral Removal Rejection message~~. The ASX Clear Participant must respond to these messages within 2 business days of receipt.

Third Party withdrawals are not currently permitted on Financial Products lodged to satisfy margin obligations on a Participant's Cash Market Account.

Introduced 11/03/04 Amended 10/12/04, 02/02/09, 07/06/13

3.7 Transfers of Collateral Lodgements

Participant to Participant Transfers

ASX Clear will only transfer Collateral from one Participant (transferring) to another Participant (receiving) after the receiving Participant [has sent a message requesting a change of controlling participant and the transferring Participant has sent the relevant authorisation message \(in accordance with the User Technical Documentation\)](#)~~has sent their 245 CHES message—Change Controlling Participant Request and the transferring Participant has sent their 251 CHES message—Change Controlling Participant Authorisation~~ and both messages have been matched in CHES's overnight processing.

Both the transferring and receiving Participants must send a ~~facsimile of~~ *Transfer of Collateral between Participants* form with the appropriate sections completed. Once the HINs have been transferred on CHES, ASX Clear will transfer the Collateral to the receiving Participant provided the *Transfer of Collateral between Participants* form is completed appropriately. Collateral lodgements will not be transferred to the receiving Participant until the above information has been received.

Once a transfer of Collateral has been processed by ASX Clear, the Participant will be sent confirmation of this via DCS.

Account to Account Transfers (Within a Participant)

If a Participant wishes to transfer Collateral lodged in respect of an Account to another Account of that Participant, the Participant must send a facsimile or letter on their standard letterhead containing the following information:

A list of the lodgements to be transferred and their existing Account numbers;

The names of the Account(s) from which the lodgement is to be transferred;

The numbers and names of the Account(s) to which the lodgement is to be transferred.

The new account names must be identical, otherwise standard withdrawals and lodgements must be processed.

Amended 16/07/07, 02/02/09, 01/03/19

3.8 Lodgement in Favour of Futures Only Participant

The ASX Settlement participant who has control of the HIN must send the lodgement and withdrawal CHES messages that show the Futures Participant No. and Account No. in the appropriate fields.

The Futures Participant must send the lodgement/withdrawal forms with the corresponding Participant and Account information. Lodgement forms must be fully completed showing the Account no., PID, HIN, client name and registered holder name.

Clients' securities are not acceptable as lodgement in favour of an Omnibus Account.

Amended 16/07/07, 02/02/09

3.9 Reports on Lodgements of Approved Financial Products as Collateral

For ASX Settlement Participants that are not ASX Clear Participants, printed reports are available from ASX Clear on request showing details of their Collateral lodgements. These include reports showing all Collateral lodged, or Collateral lodged in respect of the Accounts of specified clients (with each client on a separate page).

ASX Clear may charge for this service depending on the frequency and size of the reports.
